A personal note...

Dear Friends,

A message for yous, on the article, DAIRYFARMERS: TIME TO speak out on your behalf. To me its a shame that those working hardest to produce dairy products simply struggle hard to stay on top. It is also sad to see people sell out and start other jobs. I would be in a favor for a good premium for BST free milk. There is deffinitely a difference. Some children react from whole milk w/BST. Probaly affects others more than we realize. We are LAND O LAKES shippers I guess some companys have a small premium already for BST free. I would also suggest a better price for grassfed or with less corn in the dairys ration

A personal note...

cont:

Since there is so much research on grassfed products, for better health. Also, I think, whole milk should be available, anywhere, especialy from good grassfed herds.

Thank you for this opportunity to speak up.
