AN ORGANIC ANTHEM --- To Farm this Land Organic

Chorus

Ah but if for just one time, we would farm this land organi
And see the hand of Howard reaching for the horizon
It would be so fine, there would not be all this panic
In sweat + mud, with tears + blood, this truth we set our eyes o

For 50 years the chemicals + sprays have harmed the planet
For 50 years we've taken Mother Nature for granted
Now the time has come to be more humble + wise
Lest one day we awaken to a rather rude surprise (ch)

Leopold + Carson both wrote + warned 'bout stuff like this
That the web of life + a silent spring simply cannot co-exist
And still we're so gol'dang wrapped up in our technology + greed
We think we're cool but we are fools to play God with the seed (ch)

And so many of us now 'round the world are trying hard to farm
In time w/ Mother Nature we're trying not to harm
The life in the soil + in the water + in the air
We're learning lots of new things + what we're learning we share (ch)

And for those of us who do not farm let us have no fear
We can choose to buy our food from those whose farms are near
And if that food's organic, then, how wonderful how great
But if we wait for all who eat to care then it will be too late (ch)

'ND so it is our time will come, our time will come just so
For each of us, one by one, our time will come to go
And when we meet St Peete he'll ring that bell + he will say
Dear Friend you farmed organic, you did very well, let us pray (ch)
