13A. Exhibit A, Origin and Breeding History of the Variety

1. FANCY RED was derived from the radish breeding line C4 which was released by Paul H. Williams, from the Department of Plant Pathology, University of Wisconsin.

2. C4 was segregating for disease resistance, top size, maturity, root size, color and shape. Also most of the roots did not have the desired crispiness.

3. Individual plant selection were made from C4. These individual plants were selected for the following characteristics.

   a. Field resistance to black-root (Aphanomyces raphani). root-scurf (Rhizoctonia solani)and high resistance (greenhouse inoculation) to Fusarium wilt (Fusarium oxysporum f.SP Conglutinans race 2).

   b. Medium top size (comparable to Cherry Belle)

   c. Globe-shaped, medium-sized roots, that are bright red in color and exhibit good degree of crispiness, as well as resistance to splitting.

4. After 3-4 generations of repeated single plant selections the characters described in item Number 3 were stabilized in individual plants.

5. Individual plants described in item 4 were mass increased in an isolated plot in the field.

6. Step 5 was followed by three generations of mass selection and mass seed increase.

7. Performance trials in New York, Florida and California convinced us that one of our sub lines, A/1956, is highly stable, uniform and disease resistant.

8. A/1956 was named FANCY RED, and will be released as a novel variety, being distinct, uniform and stable.

FANCY RED

13B. Exhibit B. Novelty Statement

FANCY RED has several novel characteristics which are not present in any one single commercial red globe radish variety.

FANCY RED combines resistance to fusarium wilt (*Fusarium oxysporum* f.SP. *Conglutinans* race 2), and high field tolerances to black-root (*Aphanomyces raphani*) and root scurf (*Rhizoctonia solani*).

In addition to disease resistance, FANCY RED is adapted to a wide range of soil types and climatic conditions. The roots have high degree of crispiness and are resistant to splitting.

Ammendment added.

FANCY RED RADISH

13B. Exhibit B, Novelty Statement.

"Fancy Red" most closely resembles "Red Prince". However, "Fancy Red" is resistant to black-root caused by *Aphanomyces raphani* and to root scurf, caused by *Rhizoctonia solani*, whereas "Red Prince" is susceptible to black-root and root-scurf.

FANCY RED

13D. Exhibit D, Additional Description of the Variety.

FANCY RED has uniform, medium-sized tops, that are comparable in size to the tops of Cherry Belle. The roots are medium-sized (comparable to Scarlet Knight), and bright red in color. They are uniform globe-shaped, and exhibit good degree of crispiness. The roots also showed resistance to splitting under sub-optimal growing conditions.

FANCY RED reaches the marketable stage in around 25 days. This, however, could vary a little depending on weather and soil conditions. Although FANCY RED performs best under moderate temperatures, it did rather well under higher temperatures. Adequate soil moisture and fertility are necessary for good yield.

FANCY RED combines a number of features which make it suitable for bunching and packaging.

ASSIGNMENT

WHEREAS, Joseph Harris Company, Inc. ("Harris"), a corporation duly organized and existing under the laws of the State of Delaware is the owner of United States Plant Variety Protection Certificates listed in Exhibit A hereto; and

WHEREAS, in accordance with a Technology Transfer Agreement (the "Transfer Agreement") among Celanese Corporation ("Celanese"), Moran Seeds, Inc., Harris, CelPril Industries, Inc., Harris Moran International B.V. ("Sellers"), Virginia Chemicals, Inc., Les Produits Organiques du Santerre-Orsan S.A. ("Orsan"), HMS, CP Acquisition Inc., and Exploitatiemaatschappij Wolweversharen B.V., dated January 10, 1985, and a Purchase Agreement dated December 7, 1985, as amended, among Celanese, Sellers and Orsan, has purchased from Harris said United States Plant Variety Protection Certificates.

NOW, THEREFORE, in accordance with said Transfer Agreement and Purchase Agreement, Harris assigns to Orsan all of its rights, title and interest in and to said United States Plant Variety Protection Certificates.

Harris hereby authorizes Orsan to apply for and obtain the recordation of this Assignment. Harris agrees that it shall, without further consideration, promptly and duly cause to be performed such lawful acts and execution of any other documents as Orsan may reasonably request in order for Orsan to obtain the full benefits of this Assignment and to permit Orsan to be duly recorded in each office, bureau and tribunal in the appropriate jurisdiction as the registered owner or proprietor of each of the rights hereby assigned. Such instruments and documents shall include, without limitation, such applications, affidavits and other documents for filing in such jurisdictions as Orsan may from time to time reasonably request.

By these presents HMS does hereby accept this Assignment and authorize the recording thereof with the appropriate authorities aforesaid.

IN WITNESS WHEREOF, the parties have caused this Assignment to be executed by its proper officers thereunto duly authorized this 10th day of January, 1985.
