August 2, 2005

Attn: Mr. Leon Kaplan

Dear Mr. Kaplan,

"Sunset Review" – Organic Foods Production Act of 1990
I am in receipt of your letter dated the 26th July 2005 regarding the identification and verification of materials used in the production and processing of our organic products.

As a potential supplier of our organic products to "Organic Ingredients" we wish to confirm in writing that the only materials used in our organic extensive farming production are:

1. Copper Sulphate which is approved by our international organic inspection company (Ecocert). This material is allowed under the rules of both EEC 2092/91 & NOP final rule CFR 7 organic farming methods. Just to inform you that copper sulphate is applied as a fungicide against parasitic mushrooms. 60% of our total berry fields are not receiving copper sulphate and only 40% of the total area is being treated.

2. Organic manure is being applied to some of our organic berry growing regions and the only acceptable type of manure we are using comes ONLY from farms contracted into our organic farming programme.

I can confirm that we are not using any other materials apart from the above mentioned 2 types.

We trust that this will satisfy the terms of the "Sunset Review".

In accordance with the terms of your letter I confirm that I have faxed a copy of this letter directly to Mr. Arthur Neal of the NOP programme.

Yours sincerely.

John Walker
Export Director (Organic division)

Copy to:
Mr. Arthur Neal, Director, Program Administration, National Organic Program, USDA-AMS-TMP-NOP, 1400 Independence Ave. SW, Room 4008-So, Ag Stop 0268, Washington, DC 20250, USA.
