11-11-03

Comments Refer to Docket No. LS-03-04 to U.S.D.A.

I have listened to arguments of C.O.O.L. and am a local producer of beef. I am in total support of this program. To have products made & produced in U.S.A. & so labeled will only help producers, regardless of costs, which I believe are exagerated. Local lockers are 2-3 months back in processing meat, telling me people want to know where ~~the~~ their food comes from! The multi national food companies, I am sure are opposed to this for ~~4~~ reasons. If the F.D.A. is as good as stated let them show us we have the greatest system in the world. The consumer will respond! I have heard it countless times, Where did this food or meat come from? Let us be ~~proud~~ proud of our food system, and support COOL. For the good of all, people & consumers of America!

Sincerely

John Walther
