Dear Livestock and Seed Programs:

Please do NOT permit irradiated food to be served in the National School Lunch Program. Irradiated food has not been proven safe to eat. It degrades the nutritional content of food, and research has revealed a wide range of health problems in laboratory animals that ate irradiated food. In addition, it merely masks filthy and inhumane meat processing. Parents deserve the right-to-know what their children are eating, but irradiated food served in school cafeterias is not required to be labeled. I strongly urge you to keep irradiated food out of school lunches.

It is apparent that, while the evidence is clear that a diet high in meat, dairy, and eggs leads to obesity-related diseases, these foods remain the basis for the Federal School Lunch Program because of money. Our children deserve better!

Sincerely,

What a shame. I am really losing faith in you people!

Sincerely,
