Resolution
District II South Dakota Farmers Union
March 2003
Alexandria, South Dakota

The federal government is preparing to write the rules for Country of Origin Labeling.

Whereas: The Farm bill clearly states that individual animals need not be identified, and

Whereas: The animals that come in for feeding to the U.S. have a certificate for health and quarantine, this can be used to identify the origin of the animal. Also, a tattoo must be used to identify the country of origin of the animal;

Therefore: We the members of District II Farmers Union request that all Congressmen put forth their greatest effort to keep COOL from being killed.

Sincerely,
Ken Artz, President
