Dear Livestock and Seed Programs:

Please do NOT permit irradiated food to be served in the National School Lunch Program. Irradiated food has not been proven safe to eat. It degrades the nutritional content of food, and research has revealed a wide range of health problems in laboratory animals that ate irradiated food. In addition, it merely masks filthy and inhumane meat processing. Parents deserve the right to know what their children are eating, but irradiated food served in school cafeterias is not required to be labeled. I strongly urge you to keep irradiated food out of school lunches.

I am not yet a parent but am expecting our 1st child. I too am concerned about what my children will be eating. I do continue to educate myself but want to know what is out there

Sincerely,

Name: Callie Neff
Address: 137 N. Cedar St
City, State, Zip: Lititz, PA 17543

Dear Livestock and Seed Programs:

Irradiated fecal matter is STILL fecal matter!

Try cleaning up the commercial meat industry!

Sincerely,
