2/25/03

Greetings;

The American Producer puts out a quality product supported by some of the best land grant universities. Our government makes sure all is safety inspected.
So we need to put a flag on our products.
The consumer needs to know and have the choice.

If the overseas exporters are proud of their product let them pay for their label otherwise leave it blank.

This would also give merit to our checkoffs and promotion
I think its worth a try

Thank you for your time
Sincerely
Harry E. Chermak
