Concerning Docket LS-03-04 one would have to have a pretty good handle on geography and world events (Russian, "U.S.S.R" nuclear submarines are rotting away polluting the northern waters!). Yes! I (we) would like to know where ALL our food comes from, not just sea food! Years ago I thought farmed ~~sea food~~ fish & shell fish was a good idea, but over the years I've learned that it is WORSE then fished fish; 1 example (of many) Japan feeds farmed fish CHICKEN DROPPINGS (MANURE)

Sincerely
