Dear Sir and or Madam:

I am a 5th grade student at Patchin Elementary School in Westland, Michigan. I am writing this letter because of the irradiation of food. I learned in class that the government wants more money. My class knows that irradiated is bad for us. The irradiation food can give us cancer, still births, premature death and genetic damage The

texture. Think about the kids and the adults, not just about your money! Please change your mind about irradiated food.

Sincerely,
Louisa Villaroman
a 5th grade student from Patchin Elementary
