RECEIVED

Docket Nos: AO-0370-A7; FV00-930-1

Dear Sirs:

I, Barbara Logerquist, a Wisconsin Cherry Grower, do support the Cherry Industry Administrative Board's recommendation that ALL of the cherry producing areas of the country come under regulation. I believe that if a cherry producing state produces cherries, they are a part of the problem and should be a part of the solution as well.

I oppose the current threshold of 6,000,000 pounds and I think it should be 0 pounds. I think that this proposed amendment should also include the states of Pennsylvania and Oregon as a matter of fairness to ALL the cherry growers of this country.

Sincerely,
A Wisconsin Cherry Grower
Barbara Logerquist
