The East dry whey price range crept up this week, moving higher on both ends of the range. Inventories continue to tighten in the East, and available spot loads are becoming harder to find. Demand for dry whey has been steady. Drying schedules have kept up with the tightening liquid whey supply. Class III production has slowed as seasonal milk production has slowed. Rising temperatures in the Southeast and Mid-Atlantic are cited for lower milk volumes, while the Northeast deals with transportation issues and clean-up efforts from Hurricane Beryl.

Prices for: Eastern U.S., All First Sales, F.O.B., Extra Grade & Grade A, , Conventional, and Edible Dry Whey	
Price Range - Non-Hygroscopic; $/LB:	.4350 - .5075

Information for the period July 22 - 26, 2024, issued weekly
