

2015

ANNUAL LPGMN
STATISTICS SUMMARY

Livestock, Meat, Poultry, Grain & Slaughter Data

Livestock, Poultry and Seed Programs
Livestock, Poultry and Grain Market News Service
Des Moines, Iowa

The USDA Agricultural Marketing Service is proud to present the 2014 edition of the Annual *LPGMN Statistics Summary*, which contains market price information for cattle, hogs, and sheep, as well as beef, pork, lamb, veal, various livestock by-products, poultry, eggs and grain. As in previous years, this annual summary also provides actual livestock slaughter and meat production data supplied by the USDA National Agricultural Statistics Service, whose contributions to this book are always appreciated.

While this publication contains a wealth of valuable information, the Annual *LPGMN Statistics Summary* is only a condensed version of the market data that is actually available. More detailed historical market information and statistics for all of the reported commodities are available upon request from the Livestock, Poultry and Grain Market News office in Des Moines, Iowa. Furthermore, for current market reports and publications, visit our web site at www.ams.usda.gov/lpsmarketnewspage.

We appreciate this opportunity to serve you and hope that the 2014 Annual *LPGMN Statistics Summary* proves useful in the coming years. Please feel free to contact our office if we can ever be of service.

Sincerely,

The Livestock, Poultry and Grain Market News Service Staff, Des Moines, Iowa

Index

Definition of Terms

An average price is computed by dividing the sum of the midpoints of price ranges reported during the period by the number of price ranges during the period.

A weighted average price is computed by dividing the total value of the sales during the period by the total number of units sold during the period.

A yearly average price is the mean of the 12 monthly averages, unless otherwise noted.

A monthly average price is not computed when a price is not reported for 5 or more consecutive trading days. A yearly average price may not be computed when an average price is not reported for 1 or more months.

Where appropriate, a yearly price may be computed when the volumes associated with all reported prices can be determined; in which case, a yearly weighted average may be reported.

Matched plant comparisons are made by comparing information from the same sources reporting in each of two different periods, e.g., current and previous week or current and previous year.
