Disease Free Certification Statements for the United Arab Emirates (UAE)

Shell Egg Grading Certificate No. SEA - _____ Dated: _____

“The U. S. Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services certifies that:

The poultry from which the eggs were derived originate from:

- a. A county free of highly pathogenic avian influenza, as defined by the OIE, for the previous 28 days.
- b. A county free of Newcastle disease, as defined by the OIE, for the previous 3 months.
- c. Salmonella enteritidis (SE) – certified breeding flocks which have not been identified within 90 days before shipment as being infected with SE, including SE phage type 4.

The eggs are produced and packed in an establishment (farm/packaging facility) in which no case of highly pathogenic avian influenza has occurred in poultry as defined by the OIE within a 25km radius of the establishment(s).

These eggs were produced in the county(ies) in the state of (state name) identified below:”
