Re: Comments on Proposed Rule to Exempt Organic Producers from Assessment by Research and Promotion Programs, Docket No. PY-02-006, 69 Federal Register 22690-22702, April 26, 2004

I am a consumer interested in supporting organic agriculture. I appreciate the opportunity to comment of this proposed regulation.

I support the proposed regulation Organic agricultural products should be supported in any way possible, and this regulation relieves organic producers from onerous fees paid to a program which provides no benefit to their product. Organic products should be viewed as a separate commodity from conventional products, and it is a wise decision to treat them as such with this proposed regulation.

Respectfully submitted,

Heather Carroll
