# Federal Milk Order Market Statistics

## 2005 Annual Summary

## PREFACE

Federal milk marketing orders are established under the authority of the Agricultural Marketing Agreement Act of 1937, as amended. The Secretary of Agriculture is authorized by this statute, under certain conditions and with producer approval, to issue milk marketing orders that require handlers to pay at least the minimum specified prices for milk purchased from producers. The complete orders are published in the U. S. Code of Federal Regulations, Parts 1000 to 1199.

This is an annual summary of monthly Federal milk order statistical data. These data have been compiled from reports that handlers (milk processors) are required to file monthly with the market administrator who administers the respective Federal milk order. These reports show the volume of milk receipts from each source and quantity of milk used in each form. From these reports, data are compiled and totaled for each order by the market administrator. The order summary report is submitted to the Market Information Branch in Dairy Programs and is combined with the summary reports for the other orders.

The data in this summary is for 2005. Similar data for the period from 1947 through 2004 have been published in 48 previous annual summaries.

Issued October 2006

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact the USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, DC, 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

## **HOW FEDERAL MILK ORDER STATISTICS ARE DEVELOPED**

### **Introduction.**

The statistical data generated through the administration of the Federal milk order program is recognized widely as one of the benefits of this program. These data provide comprehensive and accurate information on milk supplies, utilization, and sales, as well as class prices established under the orders and prices paid to dairy farmers (producers). The sources of this data are monthly reports that are required to be filed by milk processors (handlers) subject to the provisions of the various milk orders. The local market administrator uses these reports to administer the provisions of the order and to assemble a series of statistical reports that summarize individual handler operations for the order, which are submitted to the Market Information Branch in Dairy Programs in the Agricultural Marketing Service.

### **Why Are Figures Collected?**

Each month, regulated handlers (fluid milk processors subject to the provisions of a Federal milk order) are required to file a report of milk receipts and utilization (R & U Report) with the order's market administrator (MA). The MA is the Federal official in each market who, with the assistance of a staff, administers the terms of the Federal order. The R & U report shows, for the month, the quantities of milk and milk products received at the handler's plant from each source, either directly from farms or from other plants, and how this milk was used in the plant. All major fluid milk products and manufactured milk products are listed on the report form, and handlers are required to specify the volume and butterfat content, and in some cases, other milk components, of all milk used in each product. On the basis of these reports, the MA determines the amount of milk that handlers use in each price class, makes computations of each handler's pool obligation, and calculates the minimum price the handler must pay producers. The MA also receives producer payroll reports from regulated handlers which are used to verify proper payments to producers and reports from nonpool handlers which are used to determine regulatory status.

### **Are Reported Figures Verified?**

The local market administrator maintains a staff of highly-trained auditors who, on a monthly basis, review at each handler's location, the books and records of plant operations for a previous time period. The auditors examine these records to determine whether the milk actually was received and used as reported, and therefore, whether the handler's pool obligation was computed correctly. Reporting errors are corrected; if necessary, pool obligations are revised. Auditors also determine whether required payments were made to producers. As a result, all data reported by handlers is subject to audit.

### **How Are Summary Statistics Developed?**

After the handler pool obligations have been determined, the local market administrator generates a series of reports that compile order totals from the individual handler reports and submits these to the Market Information Branch (MIB) in the Dairy Programs headquarters office. The MIB compiles program-wide totals from the individual order reports and disseminates this information in a series of monthly and annual releases on the Internet, in the weekly "Dairy Market News Report," and in its own publications. Since milk marketing order statistics are based on reports filed by the population of possible reporting firms and not a sample, these statistics are comprehensive. Also, since the individual firm reports are subject to audit and verification, these statistics are accurate and reliable. Federal milk orders use terms that are specifically defined in order provisions. It is recommended that users of Federal milk order statistics become familiar with these terms, some of which are described beginning on page 6 of this publication.

## **BRIEF DESCRIPTION OF FEDERAL MILK ORDER TERMS**

Following is a brief description of some terms used in Federal milk order statistics. For a detailed description of Federal milk order terms, see the specific order provisions in the Code of Federal Regulations.

### **Federal Milk Marketing Order.**

A Federal milk marketing order is a regulation issued by the Secretary of Agriculture. Its purpose is to stabilize markets by placing certain requirements on the handling of milk in the area it covers. It is established under the authority of the Agricultural Marketing Agreement Act of 1937, as amended. It requires milk handlers in a marketing area to pay not less than certain minimum class prices established according to how the milk is utilized. These prices are established under the order after a public hearing at which evidence is received on the supply and demand conditions for milk in the market. A milk order, including the pricing provisions and all other provisions, becomes effective only after approval by dairy farmers. It requires that payments for milk be pooled and paid to individual farmers or cooperative associations of farmers on the basis of a uniform or average price.

### **Marketing Area.**

A marketing area is an area designated in a Federal milk order's provisions within which the handling of milk is regulated by the order. Generally, the size of the marketing area is determined by the sales territory of competing handlers. The recent consolidation of orders also looked at overlapping areas of milk supply, the number of handlers within the area, natural boundaries, cooperative association service areas, common regulatory provisions, and milk utilization in common dairy products.

### **Producer.**

A producer is usually any dairy farmer who sells milk to a pool handler. Producers must produce milk in compliance with Grade A inspection requirements, and their milk must be either received at a pool plant or diverted to a nonpool plant for the account of a pool handler. Producer-handlers are not producers.

### **Handler.**

A handler is a person--an individual, partnership, corporation, association, or other business unit, that is subject to the provisions of an order. A handler can be an operator of a plant that is approved by a duly constituted regulatory agency for the handling of Grade A milk. A handler also can be a milk distributor or a broker. A cooperative association that does not operate a plant can be a handler.

### **Pool Handler.**

A pool handler is a handler that is subject in full to the provisions of the order. A pool handler can be an operator of a plant that meets the minimum performance standards included in each order, a pool plant. Such plants include distributing plants, plants primarily engaged in processing packaged fluid milk products, and supply plants, plants primarily engaged in producing manufactured dairy products. A cooperative association that does not operate a plant can be a pool handler. A milk distributor or broker cannot be a pool handler.

### **Nonpool Handler.**

A nonpool handler is an operator of a plant that, while it receives, processes, or distributes milk in the marketing area, does not meet the minimum performance standards of the order, a nonpool plant. Nonpool plants include: a plant fully regulated under another Federal order; a producer-handler plant, generally a person that operates both a dairy farm and a distributing plant; a partially regulated distributing plant; an unregulated supply plant; or, an exempt plant, a plant operated by a governmental

agency or a duly accredited college or university, for charitable purposes, or from which less than 150,000 pounds per month are distributed. Some nonpool handlers file monthly reports with the local market administrator that basically are used to determine regulatory status, but also provide some market statistics.

### **Receipts of Milk.**

Federal milk order statistics include volumes of milk received by handlers regulated under each of the Federal orders. Receipts of milk principally come from producers, but also may include other sources. The volume of milk that is reported as received by handlers from producers includes all such milk regardless of where it may be sold. Milk identified as that received from producers for a given market may come directly from nearby producers or from producers associated with a supply plant which, although located several hundred miles from the marketing area, is pooled on the market. Producer milk also may include milk that is diverted by a pool plant operator to another pool plant or to a nonpool plant. Other source receipts can include milk and dairy products transferred or diverted from plants regulated under other Federal orders or received from unregulated sources such as unregulated supply plants or producer-handlers.

### **Classes of Milk.**

There are four classes of milk utilization defined in Federal orders. Class I use is milk disposed as a fluid milk product, milk products intended to be used as a beverage. Class I uses include plain and flavored whole milk, fat reduced milks, and eggnog. Class II use includes milk used to produce fluid cream and other cream products, cottage cheese, frozen desserts, and other food products. Class III use includes milk used to produce hard cheeses and cream cheese. Class IV includes milk used to produce butter and any milk product in dried form.

### **Pricing System.**

The Federal milk order program uses product price formulas to determine milk component values which are combined to calculate monthly class prices. See page 45 for the applicable class price formulas. The factors in the formulas are dairy product prices, which change monthly, and make allowances and product yields, which are set in the formulas. The dairy product prices are those collected weekly by the National Agricultural Statistics Service in USDA. The most recent four or five weeks of prices are weighted by the applicable weekly volumes to determine a monthly average. Butter, Cheddar cheese and dry whey prices are used to compute values for butterfat, protein, and other solids, respectively. The protein and other solids prices are used to calculate the Class III skim milk price which, combined with the butterfat price, determines the Class III milk price. Butter and nonfat dry milk prices are used to compute values for butterfat and nonfat solids, respectively. The nonfat solids price is used to calculate the Class IV skim milk price which, combined with the butterfat price, determines the Class IV milk price. The Class II price is determined by the Class II skim milk price, which is computed in advance (see Class I price description below), and the Class II butterfat price, the butterfat price plus \$0.007. The Class II, III, and IV prices are the same in each Federal milk order and are announced by the 5<sup>th</sup> of the following month.

Class I prices vary across the Federal milk order system and are announced in advance by the 23<sup>rd</sup> of the preceding month. The Class I skim milk price is the higher of the advanced Class III or IV skim milk pricing factors plus a differential specific to each pricing point in the country. The Class I butterfat price is the advanced butterfat pricing factor plus the specific Class I differential divided by 100. The advanced skim milk pricing factors use the same product price formulas as the Class III and IV prices except that the product prices are for the most recent two weeks. The Class II skim milk price is the Class IV advanced skim milk pricing factor plus a differential of \$0.70 and also is announced by the 23<sup>rd</sup> of the preceding month.

### **Producer Prices.**

The Federal milk order program has two systems for paying producers, the component pricing system and the skim milk/butterfat pricing system. In the component pricing system, which is used in seven orders, producer prices are based on the value of components, butterfat, protein, and other solids, in the milk they market and the value of the producer price differential. The component values are those computed for the Class III price. The producer price differential, basically, is the weighted average value of the effective Class I and II differentials; the weights being the proportional volumes of milk used in Class I and II. Producers receive a price for each pound of milk component marketed and the producer price differential for each hundredweight of milk marketed. In four of the seven orders, producer prices are adjusted for milk quality as measured by the somatic cell count of the milk. For informational purposes, a statistical uniform price is calculated which equals the Class III price plus the producer price differential.

In the skim milk/butterfat pricing system, which is used in four orders, producer prices are based on the uniform skim milk price and the uniform butterfat price. The uniform skim milk and butterfat prices are the weighted average values of each class's skim milk and butterfat prices. The weights are the volumes of skim milk and butterfat used in each class. Producers receive the uniform skim milk price for each hundredweight of skim milk marketed and the uniform butterfat price for each pound of butterfat marketed. The uniform milk price under this pricing system is the weighted average value of the uniform skim milk and butterfat prices in 3.5% butterfat content milk.

### **Sales of Fluid Milk Products.**

In Federal milk order market statistics, an important distinction is made between sales of packaged fluid milk products in a marketing area (in-area) and packaged disposition of Class I products by handlers regulated in a market. The latter are total dispositions under an order by fully regulated handlers only. Dispositions can occur both inside and outside the defined marketing area of that order and can include both route sales and transfers to nonpool or unregulated handlers. A route sale is a delivery to a retail or wholesale outlet (except a plant), either directly or through a distribution facility. A transfer is a sale (delivery) to another plant. Besides receipts from producers, these dispositions also may include receipts from other Federal order plants and/or receipts from other sources.

In-area sales includes route sales in each of the marketing areas from all sources; handlers regulated under the respective order, handlers regulated under other Federal orders, partially regulated handlers, exempt handlers, and producer-handlers. These data are useful in appraising trends in the sales of fluid milk products and in the per capita consumption of fluid milk products in the Federal order marketing area.

Table 1--Federal Milk Orders in Effect on December 31, 2005, with Number Assigned Each Order in Code of Federal Regulations and Date on Which Each Order Became Effective

Federal Milk Order	CFR Chapter 7 Part Number	Date Effective
<p>Appalachian...1/..... \* Data not available. 1/ End of year. Figures for following time periods on respective U.S. Census: 1951-59 (1950), 1960-70 (1970), 1980, 1990, and 2000.

Figures for following time periods are estimated based on other Census Bureau reports. 1972-79, 1981-99, and 2001 to date. 3/ Average for year. 4/ Beginning in 1988, due to disadvantageous price situations in some markets, handlers elected not to pool milk that normally would have been associated with the order. This has reduced, sometimes substantially, the volume of producer milk receipts reported for some markets. This can also affect significantly the comparability of other "Measures of Growth" based on this statistic. 5/ Prices are simple averages for 1947-61 and weighted averages for 1962 to date. 6/ Based on blend (uniform) price adjusted for the butterfat content, and starting in 1988, other milk components of producer milk.

1/ These figures are the population in the counties, parishes, independent cities, and local subdivisions of the States listed that make up the marketing area. The source of these figures is the 2000 Population Census conducted by the Bureau of the Census, U.S. Department of Commerce.

2/ These figures are estimated based on the statewide percent changes in population between April 1, 2000 and July 1, 2005. These updates are best used as an estimate of population for the year and should not be compared to previous updates to measure change overtime.

# CONSOLIDATED FEDERAL MILK MARKETING ORDER AREAS

## SUMMARY OF MAJOR ORDER ACTIONS DURING 2005

### APRIL

Arizona-Las Vegas – April 1 (70 FR 9846, 3/1/05.) This interim final rule amends the *Producer milk* provision of the Arizona-Las Vegas milk marketing order to eliminate the ability to simultaneously pool the same milk on the order and on a State-operated order that provides for marketwide pooling.

### MAY

Pacific Northeast – May 1 (70 FR 18963, 4/12/05.) This final rule adopts without change an interim final rule, effective 2/1/04, which amended the *Producer milk* provision of the Pacific Northwest milk marketing order to eliminate the ability to simultaneously pool the same milk on the order and on a State-operated order that provides for marketwide pooling.

### JUNE

Northeast – June 1 (70 FR 18961, 4/12/05.) This final rule amends the pooling and related provisions of the Northeast milk marketing order. Specifically, this action: (1) establishes year-round supply plant performance standards; (2) excludes milk received by supply plants from producers not eligible to be pooled on the Northeast order from supply plant performance standards; (3) removes the “split-plant” provision; (4) establishes a one-day “touch base” standard; (5) establishes explicit diversion limits for pool plants; (6) prohibits the ability to simultaneously pool the same milk on the order and a marketwide pool administered by another government entity; and, (7) grants authority to the Market Administrator to adjust the touch-base and diversion limit standards as market conditions warrant. The reporting and payment date provisions also were amended.

### JULY

Upper Midwest – July 1 (70 FR 31321, 6/1/05.) This interim final rule amends the pooling standards and transportation credit provisions of the Upper Midwest milk marketing order. Specifically, this action: (1) revises the supply plant performance standards so that milk seeking to be pooled on the order demonstrates consistent service to the Class I market; (2) prevents handlers located within the States that comprise the Upper Midwest marketing area from qualifying milk located outside of the States that comprise the marketing area; (3) eliminates diversions to nonpool plants outside of the States that comprise the Upper Midwest marketing area; and (4) establishes a limit of the receipt by handlers of a transportation credit to milk movements of 400 miles or less.

### OCTOBER

Mideast – October 1 (70 FR 56111, 9/26/05.) This interim final rule amends the pooling standards of the Mideast milk marketing order. Specifically, this action: (1) prohibits the ability to simultaneously pool the same milk on the Mideast Federal milk order and on a marketwide equalization pool administered by another government entity; (2) lowers the diversion limit standards; and (3) increases the performance standards for supply plants.

## NOVEMBER

Appalachian and Southeast – November 1 (70 FR 59221, 10/12/05.) This partial final rule: (1) expands the Appalachian milk marketing area into 25 unregulated counties and 15 unregulated independent cities in the State of Virginia; (2) eliminates the ability to simultaneously pool the same milk on the Appalachian or Southeast order and on a State-operated milk order that has marketwide pooling; and (3) amends the transportation credit provisions of the Southeast and Appalachian orders.

Table 4--Number of Pool Handlers, Supply Plants, and Distributing Plants Under Federal Milk Orders, by Order, December 2005

Federal Milk Order Marketing Area	Order Number	Pool Handlers 1/	Supply Plants 2/	Distributing Plants 3/
Northeast	001	64	14	57
Appalachian	005	34	1	21
Southeast	007	39	3	28
Florida	006	17	0	12
Mideast	033	32	4	42
Upper Midwest	030	55	57	25
Central	032	24	8	31
Southwest	126	18	3	22
Arizona-Las Vegas	131	4	1	3
Pacific Northwest	124	15	6	15
All Markets Combined		302	97	256

1/ See page 6 for definition of the term "handler".

2/ Plants primarily engaged in producing manufactured dairy products. Includes cooperative manufacturing plants per section XXXX.7(d).

3/ Plants primarily engaged in processing or packaging fluid milk products.

## FEDERAL MILK ORDER PRICE FORMULAS FOR 2005

Note: Milk prices are per 100 pounds or cwt., rounded to the nearest cent.  
Component prices are per pound, rounded to nearest one-hundredth cent.  
Cheese, dry whey, butter, and nonfat dry milk prices are weighted monthly averages of weekly NASS survey prices, rounded to the nearest one-hundredth cent.

### Class I:

Class I Price = (Class I skim milk price x 0.965) + (Class I butterfat price x 3.5).  
Class I Skim Milk Price = Higher of advanced Class III or IV skim milk pricing factors + applicable Class I differential.  
Class I Butterfat Price = Advanced butterfat pricing factor+ (applicable Class I differential divided by 100).

Note: Advanced pricing factors are computed using applicable price formulas listed below, except that product price averages are for two weeks.

### Class II:

Class II Price = (Class II skim milk price x 0.965) + (Class II butterfat price x 3.5).  
Class II Skim Milk Price = Advanced Class IV skim milk pricing factor + \$0.70.  
Class II Butterfat Price = Butterfat price + \$0.007.  
Class II Nonfat Solids Price = Class II skim milk price divided by 9.

### Class III:

Class III Price = (Class III skim milk price x 0.965) + (Butterfat price x 3.5).  
Class III Skim Milk Price = (Protein price x 3.1) + (Other solids price x 5.9).  
Protein Price = ((Cheese price - 0.165) x 1.383 + (((Cheese price - 0.165) x 1.572)-  
Butterfat price x 0.9) x 1.17).  
Other Solids Price = (Dry whey price - 0.159) times 1.03.  
Butterfat Price = (Butterfat price - 0.115) times 1.20.

### Class IV:

Class IV Price = (Class IV skim milk price x 0.965) + (Butterfat price x 3.5).  
Class IV Skim Milk Price = Nonfat solids price x 9.  
Nonfat Solids Price = (Nonfat dry milk price - 0.14) x 0.99.  
Butterfat Price = See Class III.

Somatic Cell Adjustment Rate = Cheese price x 0.0005, rounded to fifth decimal place.  
Rate is per 1,000 somatic cell count difference from 350,000.

Table 30--NASS Dairy Product Price Averages Used in Federal Milk Order Price Formulas, 2005 <sup>1/</sup>

1/ This price is shown for informational purposes only; it is not defined in Section 1000.50 of the order. It equals (the base skim milk price for Class I times 0.965) plus (the advanced butterfat pricing factor times 3.5).

2/ The higher of the advanced Class III or IV skim milk pricing factors. The Class I skim milk prices equals this price plus the applicable Class I differential.

3/ The Class I butterfat price equals this price plus the (applicable Class I differential divided by 100).

1/ See Table 31--Federal Milk Order Class I and Class II Advanced Prices and Pricing Factors, for Class II skim milk prices.

2/ Butterfat price for both Class III and IV.

3/ Producer component prices; applicable to orders 1, 30, 32, 33, 124, and 126.

4/ Adjustment to producer payment in component pricing orders with this provision. Rate is per 1,000 somatic cell count difference from 350,000. Somatic cell counts below 350,000 result in a positive adjustment and a higher payment. Counts above 350,000 result in a lower payment.

Table 33--Federal Milk Order Principal Pricing Points, with Class I Differentials

Federal Milk Order	Principal Pricing Point	Major City in Principal Pricing Point	Class I Differential for:	
			Principal Pricing Point	Other Major Cities in the Order
Northeast	Suffolk Co., MA	Boston	\$3.25	New York City, \$3.15; Philadelphia, \$3.05; Baltimore, \$3.00; and Washington, DC, \$3.00
Appalachian	Mecklenburg, Co., NC	Charlotte	\$3.10	Knoxville, \$2.80 and Louisville, \$2.20.
Southeast	Fulton Co., GA	Atlanta	\$3.10	New Orleans; \$3.60; Memphis, \$2.80; Nashville, \$2.60; and Springfield, MO., \$2.20
Florida	Hillsborough, Co., FL	Tampa	\$4.00	Orlando, \$4.00 Miami, \$4.30; and Jacksonville, \$3.70.
Mideast	Cuyahoga Co., OH	Cleveland	\$2.00	Indianapolis, \$2.00; Cincinnati, \$2.20; Pittsburgh, \$2.10; and Detroit, \$1.80
Upper Midwest	Cook Co., IL	Chicago	\$1.80	Milwaukee, \$1.75; and Minneapolis, \$1.70.
Central	Jackson Co., MO	Kansas City	\$2.00	Des Moines, \$1.80; Omaha, \$1.85; Oklahoma City, \$2.60; St. Louis, \$2.00, and Denver, \$2.55.
Southwest	Dallas Co., TX	Dallas	\$3.00	Houston, \$3.60; San Antonio, \$3.45; Albuquerque, \$2.35; and El Paso, \$2.25
Arizona-Las Vegas	Maricopa Co., AZ	Phoenix	\$2.35	Las Vegas, \$2.00.
Pacific Northwest	King Co., WA	Seattle	\$1.90	Portland, \$1.90; and Spokane, \$1.90.

1/ For those orders that use the component pricing system for paying producers (orders 1, 30, 32, 33, 124, and 126), the figures are the statistical uniform price (the sum of the producer price differential and the Class III price). For those orders that use the skim milk/butterfat pricing system for paying producers (orders 5, 6, 7, and 131), the figures are the uniform price (the sum of the uniform butterfat price times 3.5 and the uniform skim milk price times 0.965). Figures are shown at 3.5 percent butterfat; see Table 33 for principal pricing points of markets. All averages are weighted using the applicable pounds of total producer milk receipts.

Pacific Northwest	124	6.28	7.50	0.70	0.19	---	---	14.67

1/ For those orders that use the component pricing system for paying producers (orders 1, 30, 32, 33, 124, 126, and 135), the uniform milk price at test is the sum of the values of the butterfat, protein, and other solids components and the producer price differential. Orders 30, 32, 33, and 126 also include an adjustment for the somatic cell count in producer milk. For those orders that use the skim milk/butterfat pricing system for paying producers (orders 5, 6, 7, and 131), the uniform milk price at test is the sum of the values of butterfat and skim milk.

2/ For those orders using the component pricing system (see 1/); the butterfat value is the annual average Class III butterfat price (see Table 32) times the order's annual average pounds of butterfat in 100 pounds of producer milk (see Table 8 for butterfat tests). For those orders using the skim milk/butterfat pricing system (see 1/); the butterfat value is the annual average uniform butterfat price (see Table 38) times the order's annual average pounds of butterfat in 100 pounds of producer milk (see Table 8 for butterfat tests).

3/ The protein value is the annual average Class III protein price (see Table 32) times the order's annual average pounds of protein in 100 pounds of producer milk (see Table 10 for protein tests).

4/ The other solids value is the annual average Class III other solids price (see Table 32) times the order's annual average pounds of other solids in 100 pounds of producer milk (see Table 11 for other solids tests).

5/ The producer price differential is the annual average producer price differential for the order (see Table 39).

6/ The somatic cell adjustment value is the annual average of the somatic cell adjustment rate (see Table 32) times the difference between 350,000 and the annual average somatic cell count for all producer milk under the order (see Table 12).

7/ The skim milk value is the annual average uniform skim price for the month (see Table 37) times the order's annual average proportion of skim milk in 100 pounds of producer milk (1 minus the order's annual average butterfat test; see table 8).

Table 42--Uniform Milk Price at Test and Gross Value of Producer Milk Receipts for All Producers and Per Producer, by Federal Milk Order Marketing Area, 2005

Federal Milk Order Marketing Area	Order Number	Uniform Milk Price at Test 2/ Dollars per Cwt.	Gross Value of Milk Receipts 1/	
			All Producers 1,000 Dollars	Per Producer Dollars
Northeast	001	16.03	3,777,628	253,249
Appalachian	005	16.43	1,050,567	334,255
Southeast	007	16.35	1,233,730	351,891
Florida	006	17.73	554,185	1,597,075
Mideast	033	15.07	2,721,537	289,433

Central	032	14.93	2,084,582	373,046
Southwest	126	15.84	1,517,156	1,856,984
Arizona-Las Vegas	131	14.79	436,007	4,954,621
Pacific Northwest	124	14.67	1,033,813	1,259,211
All Markets Combined		15.48	17,747,577	334,626

1/ For component pricing orders (orders 1, 30, 32, 33, 124, and 126), the sum of the value of producer milk components and the value of the producer price differential. For skim/butterfat pricing orders (orders 5, 6, 7, and 131), the product of producer milk receipts in hundredweights (cwts.), and the uniform price at test.

2/ For component pricing orders (see 1/), equals the Class III price adjusted to the applicable component test of producer milk receipts plus the producer price differential. For skim/butterfat pricing orders (see 1/), equals the sum of the uniform skim milk price times (1 minus (the butterfat test of producer milk receipts divided by 100)) plus (the uniform butterfat price times (the butterfat test of producer milk receipts)).

1/ These figures are representative of the consumption of fluid milk products in Federal milk order marketing areas. Fluid milk products include: plain and flavored whole milk, eggnog, plain and flavored fat-reduced milk, buttermilk, and miscellaneous fluid milk products.

2/ All Markets Combined and TOTAL may not add due to rounding.

3/ Effective April 1, 2004, the Western Federal milk order was terminated.

1/ Includes sales in each area by handlers regulated under the respective order, by handlers regulated under other orders, by partially regulated handlers, by exempt handlers, and by producer-handlers. (See page 6 for the definitions of these handler types.) Sales routes of some handlers may extend outside defined marketing areas; therefore some in-area sales may be partially estimated.

2/ May include miscellaneous fluid milk products.

3/ The in-area sales data for this order does not include all the sales in the marketing area due to the reporting exemption of fluid milk processors located in Clark County, Nevada.

5/ Less than 500,000 pounds.

1/ Includes producer milk and other source milk used to produce these products in regulated pool plants as well as milk diverted or transferred to non-order plants where these products are manufactured. It should be noted that the election not to pool milk normally associated with an order due to a disadvantageous price relationship affects the comparability of this statistic.

2/ Includes milk and cream mixtures, light cream, and heavy cream.

3/ Includes ricotta cheese.

4/ Includes listed product groupings, miscellaneous cream products, "other" food products, and restricted data per 5/.

5/ Data are restricted; pertains to the operations of fewer than three handlers. Data are included in the "All Markets Combined" figure for the product grouping.

6/ Data are restricted; pertains to the operations of fewer than three handlers. Data are included in "Total Class II".

1/ Includes producer milk and other source milk used to produce these products in regulated pool plants as well as milk diverted or transferred to non-order plants where these products are manufactured. It should be noted that the election not to pool milk normally associated with an order due to a disadvantageous price relationship affects the comparability of this statistic.

2/ Includes listed product groupings, evaporated or sweetened condensed milk in consumer type packages ( May through December only), nonfat solids used to fortify fluid milk products, and restricted data per 4/.

3/ Milk and dairy products that have been dumped, used for animal feed, or destroyed. Such uses are assigned to the lowest prices for the month: Class III in February; and Class IV in all other months.

4/ Data are restricted; pertains to the operations of fewer than three firms. Data are included in the "All Areas Combined" figure for the product grouping.

SCHEDULE OF FEDERAL MILK ORDER MARKET ADMINISTRATOR BUDGETS 1/, BY OFFICE LOCATION 2/, CALENDAR YEARS 2005 AND 2006 - CON.

1/ Market Administrators' budgets are estimated expenses for the calendar year as reviewed and approved by the Deputy Administrator, Dairy Programs, Agricultural Marketing Service, United States Department of Agriculture. Expenses include any amounts revised as of March 27, 2006. Full disclosure of actual expenses is provided in each market administrator's annual financial statements.

2/ Budget amounts include expenses for all orders serviced by the same market administrator and are listed under each market administrator's main office location.

3/ Group Authorization includes the following expenses: Communications; employee insurance, retirement and thrift savings plan; insurance; rent; research projects; supplies; testing and weighing; utilities; and depreciation.

4/ Miscellaneous includes the following expenses: Training; uncollectible accounts; interest; subscriptions; licenses and fees; service charges; and other.

5/ Includes the Florida and Southeast milk marketing orders.

6/ Includes the Central milk marketing order.

7/ Includes the Appalachian milk marketing order.

8/ Includes the Northeast milk marketing order.

9/ Includes the Upper Midwest milk marketing order.

10/ Includes the Mideast milk marketing order.

11/ Includes the Southwest milk marketing order.

12/ Includes the Pacific Northwest and Arizona-Las Vegas milk marketing orders. Effective May 1, 2006, the name of the Arizona-Las Vegas Federal order was changed to Arizona. Clark County, Nevada which includes Las Vegas, was removed from the marketing area.
