

**National Organic Standards Board**  
**Handling Committee Recommendation**  
**for Sunset Review of Materials on**  
**§ 205.605b**

**March 18, 2008**

**I. List: 205.605 Nonagricultural (nonorganic) substances allowed as ingredients in or on processed products labeled as “organic” or “made with organic (specified ingredients or food groups.”**

**(b) Synthetics allowed**

**II. Committee Summary:**

Public notice of the sunset of this material, which was embedded in the Federal Register Notice of the Fall 2007 NOSB meeting, had elicited no public comments by early October when this committee was due to give its recommendation on the continued use of Cellulose. An additional ANPR for materials due to Sunset in the Fall of 2008, was published on December 28, 2007.

Review of the original TAP did not reveal unacceptable risks to the environment, human or animal health as a result of the use or manufacture of these materials. There is no new information contradicting the original TAP review which was the basis for the previous NOSB decision to list this substance.

Even though this material appeared not to present a risk to the environment, the sunset process requires public comment to support the continuation of this regulation. For this reason the initial recommendation of the Handling Committee in early October for the re-listing of this material failed.

In the eight weeks prior to the Board meeting, numerous comments were received requesting that this material be re-listed and there had been no comments received opposing its continued use in organic handling. Motion for the Handling Committee to reconsider their earlier vote was made and seconded prior to discussion at the November NOSB meeting where the full Board voted to recommend this material for re-listing.

The ANPR in December closed on January 28, 2008 and elicited numerous additional comments in favor of and none opposing the re-listing of this material.

### **III. Committee Recommendation(s):**

The Committee re-affirms its recommendation of November 2007 for the re-listing of the following substance(s) in this use category as published in the final rule:

Cellulose
