

We currently irrigate our field with fresh water pumped from a creek that runs through our property. There are orange groves up and down the creek, will we have a problem becoming certified organic?

Your certifying agent determines whether you can be organic. Go to <http://www.ams.usda.gov/nop> and click on 'Certifiers' and then click on 'USDA Accredited Certifying Agents,' select a state, and click 'Go,' to choose a certifying agent. Once you select a certifying agent, they will be able to guide you through the process.
