

I need an updated version of the NOP and an updated List of allowed and prohibited substances, where can I find these on the new website?

The NOP website is found at <http://www.ams.usda.gov/nop>. To obtain the full version of the regulations, click on 'Regulations' under the 'General Information' tab. Then click on 'Electronic Code of Federal Regulations (e-CFR) website. Then click on the section you require. The most current version of the National List of Allowed and Prohibited substances is also available on the e-CFR website.
