

**If you have a 'Made with organic' product, can you have nonorganic agricultural ingredients not listed on §205.606 in the product as long as they comply with §205.105?**

Yes. The requirement that a nonorganically produced agricultural product be listed in § 205.606 and be determined by an ACA as not commercially available only applies to products sold, labeled, or represented as being "Organic."
