

We are wine importers who would like to introduce organic and biodynamic wines that we currently sell in Europe into the U.S. How do we go about verifying that our wines will fulfill the criteria to be labeled as organic or biodynamic in the U.S.?

Go to <http://www.ams.usda.gov/nop>, click on 'Certifiers' under the 'I want information on' tab. Click on 'USDA Accredited Certifying Agents,' and then choose domestic or foreign, pick the state or country and select 'Go.' Choose a certifying agent from the lists, contact them and they will assist you in becoming certified organic.
