

We produce extra virgin olive oil on a small farm. Gross sales are less than \$5,000.00. We use no other chemicals except "Round-Up" for occasional weed control under olive trees. Otherwise, it is a mulch of seasoned horse manure and wood chips. Can I consider our product as organic?

No. "Round-up" is a prohibited synthetic, not appearing on the National List. Your olive oil cannot be sold, labeled, or represented as "organic." [Section 205.105.]
