

We manufacture labels for the fresh fruit and vegetable market, which currently meet all FDA requirements for this application. From reviewing 7 CFR Part 205, we would like to know if our labels, or for that matter any other packaging material (cello wrap, glass jar, plastic jar, etc.) are under any specific requirements? I did notice that there was a requirement for the material to be free of pesticides, etc., or other similar residues. If so, could you direct me to the specific requirement?

There are no NOP requirements for labels applied to the outside of packages (check with FDA for other labeling requirements) for packaging requirements, see § 205.307-309. For preventing commingling and contact with a prohibited substance see § 205.272, and § 205.201 (b)(5).
