

**We have developed a beverage that contains two ingredients not currently on the National List and we are trying to get our beverage certified as partially organic. Can these two ingredients be placed on the National List, or considered in accordance with 21 CFR 104.20 Nutritional Quality Guidelines for Foods?**

It depends on the two ingredients you want to have considered—are they vitamins, minerals, or accessory nutrients? You may need to check FDA's regulations first. You can always submit a petition to the NOP as well. Go to [www.ams.usda.gov/nop](http://www.ams.usda.gov/nop) and click on NOP-AQSS ('Access'), select "National List of Allowed and Prohibited Substances," then click "Go." Go to page 3 under "April 4, 2008" and select the question "How do I get materials added to the National List."
