

The following code can be assigned in addition to codes C3-C59, when the plant is producing cheese with added ingredients (e.g., bacon, basil, pepper, tomato, etc.). For example, a plant producing pepper jack (Monterey Jack cheese with peppers added) can request the C7 code in addition to the C60 code. If the pepper jack is in a consumer sized package the plant can also request the C50 code.

C60 Cheese With Added Ingredients
