

Producer Milk Marketed under Federal Milk Orders by State of Origin - 2012

Forty-five of the fifty states marketed some milk under Federal milk marketing orders in 2012. Thirty-seven states marketed 70% or more of their milk marketings under Federal milk marketing orders with four of those thirty-seven states marketing about 100% of their milk marketings under Federal milk marketing orders: Florida, Kentucky, Maryland, and North Carolina.

Four states marketed very small amounts of producer milk under Federal milk marketing orders: California (0.4%), Idaho (2.1%), Montana (0.2%) and Utah (5.4%) while three states did not market any milk under federal milk marketing orders: Alaska, Hawaii, and Nevada.

States marketing milk under Federal milk marketing orders varied from marketing milk under as many as seven different milk marketing orders to as few as a single milk marketing order area as follows:

- Indiana, Michigan, Ohio, and Texas marketed milk under 7 different Federal milk marketing orders.
- Illinois, Kansas, Kentucky, Missouri, New Mexico, North Carolina, Virginia, and Wisconsin marketed milk under 5 different Federal milk marketing orders.
- Idaho, Iowa, Minnesota, Oklahoma, and West Virginia marketed milk under 4 different Federal milk marketing orders.
- Florida, Georgia, Maryland, New York, Pennsylvania, South Carolina and Tennessee marketed milk under 3 different Federal milk marketing orders.
- Alabama, Arizona, Arkansas, California, Colorado, Massachusetts, Nebraska, and South Dakota marketed milk under 2 different Federal milk marketing orders.
- Connecticut, Delaware, Louisiana, Maine, Mississippi, Montana, New Hampshire, New Jersey, North Dakota, Oregon, Rhode Island, Vermont, Washington, and Wyoming marketed milk exclusively under a single Federal milk marketing order.

The ten Federal milk marketing orders received producer milk from the following numbers of states in 2012:

- Southeast – 22 states
- Central – 22 states
- Appalachian – 20 states
- Northeast – 18 states
- Mideast – 18 states
- Upper Midwest – 14 states
- Florida – 10 states
- Southwest – 9 states
- Pacific Northwest – 5 states
- Arizona – 3 states

1/ The source of the receipt is based on the location of the producer, not the location of the regulated handler. Regional and Total U.S. figures may not add due to rounding. Excludes volumes not pooled due to disadvantageous price relationships. 2/ Computed from data contained in "Milk Production, Disposition and Income - 2012 Summary", NASS, USDA. NOTE: Total milk marketed includes milk sold to plants and dealers as whole milk and equivalent amounts of milk for cream, milk produced by dealers' own herds, milk sold directly to consumers, and milk produced by institutional herds. 3/ Milk marketed that is eligible for fluid use (Grade A in most States). 1/ Number of orders under which milk produced by dairy farmers located in the State was marketed to regulated handlers. For example, milk produced in New York was marketed under three Federal milk orders in 2012. The regional figure is the net number of orders under which the milk produced by dairy farmers located in the region was marketed to Federally regulated handlers. 1/ The source of the receipt is based on the location of the producer, not the location of the regulated handler. Marketing area totals may not add due to rounding. 2/ For some marketing areas, receipts from some States have been combined in order to protect confidentiality. The States are listed by decreasing proportions of deliveries to the marketing area. For some marketing areas, handlers elected not to pool producer milk that normally would have been associated with the marketing area due to disadvantageous price relationships.
