Subject: recommendation for wild fish task force

Dear George,

I highly recommend Jim Humphreys, Regional Director - Americas of The Marine Stewardship Council for inclusion in any wild caught fish task force you may create as well as Dick Jones, Whole Foods Market's National Seafood Buyer for either or both an aquaculture or wild fish task force. Both are extremely well versed and experienced in the subject matter.

By the way, Whole Foods Market was one of the only retailers who refrained from labeling farmed fish as organic, despite some certifiers giving that designation, as no USDA certified organic standards had been developed for that category.

Jim Humphreys
