1/ It should be noted that the election not to pool milk normally associated with an order due to a disadvantageous price relationship affects the comparability of this statistic. See footnotes on Table 21. Figures shown for all Markets Combined and Average are computed from the applicable monthly or year-to-year date totals of producer milk used in Class III and total producer milk.

2/ Effective April 1, 2004, the Western Federal milk order was terminated.
