ADDITIONAL DESCRIPTION OR COMMENTS:

SWEET PEA BIJOU SALMONETTE

13D. Exhibit D:

Came completely true in Burpee's Pennsylvania trials 1968, 1969, 1970, 1971 (not trialled 1972, 1973) and in Burpee's California trials 1968, 1969, 1970, 1971, 1972 and 1973.

The Bijou class was bred by Burpee and is unique. Has a vigorous bush habit and is a determinate vine type. Height approximately 36 cm. It regularly produces 4, 5 and often more medium sized ruffled flowers on stems generally over 14 cm long. It is therefore highly suited both to garden display and as a cut flower in small arrangements. The Bijou class is extremely early flowering, earlier than any other class we know, and appears to be more heat-resistant than any class we know.

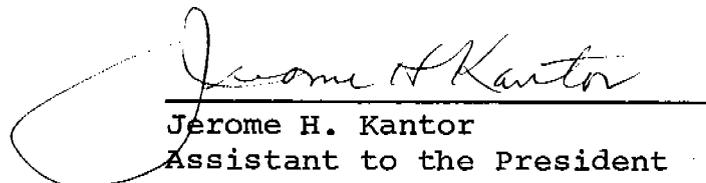

Salmonette has characteristics very similar to the other Bijou varieties. The only important distinction is its color - which is rich reddish cerise with a strong salmon tint. In color it most closely resembles Galaxy Great Scot. The nearest color to Salmonette is Red Group 50B in the RHS Color Chart 1966.
