MARIGOLD CARNATION-FLOWERED
BIG ALMOST WHITE

13B. Exhibit B:

Annual. No special characteristics of seed, seedling or fruiting stage (that is, seed head), just typical of *Tagetes erecta*, except that the foliage is somewhat liable to virescence (a functional disorder - not a disease) when grown in locations where the night temperature is 50°F. or less.

Mature plant grows about ^{22 R/S.} ~~19~~ inches tall. Flowers about 3½ inches diameter, fully double carnation-flowered type with fairly broad outer petals and centers well filled with disc florets - the latter often terminating in a flattened petal. Flowers are either white or creamy white - the color depending on the location in which the flowers are grown. Flowers open with centers that are tinted with greenish yellow, but this tint disappears as the flowers mature. Leaves are fairly dark green and pinnatisect, segments linear, lanceolate, toothed. Most closely resembles Whitemost, but bears very much larger flowers with much better centers. Similar height, foliage size, and foliage form to Whitemost, but much deeper green foliage color than Whitemost.

MARIGOLD CARNATION-FLOWERED

BIG ALMOST WHITE

13D. Exhibit D:

Unique variety combining whiteness with a flower size, degree of doubling and flower quality never before achieved in a white American marigold. Flowers are either white or creamy white - the color depending on the location in which the flowers are grown. Flowers open with centers that are tinted with greeny yellow, but this tint disappears as the flowers mature. Leaves are fairly dark green. Most closely resembles Whitemost, but much deeper green foliage and very much larger flowers with much better centers. Flowers about $3\frac{1}{2}$ inches diameter, fully double carnation-flowered type with fairly broad outer petals and centers well filled with disc florets - the latter often terminating in a flat petal. Height about 22 inches.

Whitemost has flowers of similar color but smaller and less well doubled than Big Almost White. Flower diameter about $2\frac{1}{2}$ in. Foliage more virescent than Big Almost White. Height $2\frac{1}{2}$ ft.
