SAGITTARIUS

This freezing type pea was selected from a public variety named Bonus. Bonus was developed and released by Asgrow Seed Company in 1969. We found the original release to be susceptible to *Fusarium Oxysporum pisi* Race 1.

Thirty single plant selections were made in 1972 as a possible genetic source for multi-pod types. These were advanced two generations and tested for resistance to *Fusarium "wilt"*.

Only one of the selections showed 80 percent or above resistance. The selection number SP-26 was increased to its present quantities.

During the past three generations no variants have been observed which is evidence of varietal stability.

Approximately 1550 at 100 tenderometer

DISEASE REACTION:
* RESISTANT to Fusarium Oxsporum S.P. pisi Race 1
Susceptible to Fusarium Oxsporum S.P. pisi Race 1

INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and \$250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, 6525 Belcrest Road, Hyattsville, Maryland 20782. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

5. Insert the date the applicant determined that he had a new variety based on the definition in Section 41 (a) of the Act and decision is made to increase the seed.
- 13a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.
- 13b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.
- 13c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.
- 13d Provide complete data indicative of novelty. Seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty may be submitted. Seeds submitted may be sterile.
- 13e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

DATA INDICATIVE OF NOVELTY

Novelty is based on the unique combination of the following characters:

Sagittarius is similar to Bonus in vine appearance and podding characters except, it is (1) an earlier maturity pea by 2 days, (2) it has a lower average ovule count per pod, (3) it produces .60 average sieve larger peas, (4) it's vine height is 7 cm shorter, (5) it's average seed size per pound is 400 peas less, (6) it is resistant to Fusarium Oxysporum S.P. pisi Race 1.

Bonus is, to the best of our knowledge, the variety most similar to Sagittarius.
