INSTRUCTIONS

General: Send an original copy of the application and exhibits, at least 2,500 viable seeds, and \$500 fee (\$250 filing fee and \$250 examination fee) to U.S. Department of Agriculture, Agricultural Marketing Service, Livestock, Meat, Grain and Seed Division, Plant Variety Protection Office, National Agricultural Library Building, Beltsville, Maryland 20705. (See section 180.175 of the Regulations and Rules of Practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

Item

- 9 Give the date the applicant determined that he had a new variety based on (1) the definition in section 41(a) of the Act and (2) the date a decision was made to increase the seed.
- 14a Give: (1) the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method; (2) the details of subsequent stages of selection and multiplication; (3) the type and frequency of variants during reproduction and multiplication and state how these variants may be identified and (4) evidence of uniformity and stability.
- 14b Give a summary statement of the variety's novelty. Clearly state how this novel variety may be distinguished from all other varieties in the same crop. If the new variety most closely resembles one or a group of related varieties: (1) identify these varieties and state all differences objectively; (2) attach statistical data for characters expressed numerically and demonstrate that these differences are significant; and (3) submit, if helpful, seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty.
- 14c Fill in the Exhibit C, Objective Description form, for all characteristics for which you have adequate data.
- 14d Describe any additional characteristics that are not described, or whose description cannot be accurately conveyed in Exhibit C. Use comparative varieties as is necessary to reveal more accurately the description of characteristics that are difficult to describe, such as plant habit, plant color, disease resistance, etc.
- 15 If "Yes" is specified (*seed of this variety be sold by variety name only as a class of certified seed*) the applicant may NOT reverse his affirmative decision after the variety has either been sold and so labeled, his decision published, or the certificate has been issued. However, if the applicant specified "No," he may change his choice. (See section 180.16 of the Regulations and Rules of Practice.)
- 16 See section 42 of the Plant Variety Protection Act and section 180.7 of the Regulations and Rules of Practice.

"EXHIBIT A"

Origin and Breeding History of 'HP 4800'

1. HP 4800 originated from a hand pollinated cross of '70-4428' x '70-5126'. Both lines are North American Plant Breeder's breeding lines with the following parentage:

The cross was made during the summer of 1971. The F₁ and F₃ generations were grown in a Puerto Rico winter nursery during the winters of 1971-72 and 1972-73. The F₂, F₄, F₅ and F₆ generations were grown in Iowa. Early generations were advanced using a modified single seed descent technique. Single plants of the cross were selected in Iowa and progeny rows were planted in Iowa during the spring of 1975. HP 4800 was F₅ derived.

2. In 1977, single plants of the variety were reselected and grown in progeny rows in 1978. Only rows conforming to a standard were harvested and bulked.

The genetic make-up of the variety was stabilized in the sixth generation (1974). The variety has remained stable and the sole purpose for reselection was for beginning multiplication for commercial seed stock production. The variety is essentially not changed, but only mixtures removed that have occurred during the two years of yield trials.

3. HP 4800 has been tested since 1976. See attached for 1977-1980 data. HP 4800 has only been tested under one experimental designation. EX 6247.
4. Discernible variants are not an inherent component of the variety.

"EXHIBIT B"

Novelty is based on the unique combination of the following characters:

'HP 4800' is a semi-determinate (Dt₂) variety. It is distinguished from most other varieties by this trait. HP 4800 is most similar to the soybean variety 'Will'. However, HP 4800 differs from Will in hilum color, pod color, pubescence color, seed coat luster and maturity.

1. HP 4800 has yellow hilum color where Will has black.
2. ~~HP 4800 has tawny pod color where Will has brown~~ R/S 4/2/82
3. HP 4800 has gray pubescence where Will is tawny.
4. HP 4800 has dull seed coat luster where Will has shiny.
5. HP 4800 is a mid Group IV maturity where Will is a late Group III.

Re: Agripro Biosciences Inc. Sale of PVPs to AGR Acquisition Corporation (which has changed its name to Agripro Seeds, Inc.)

Dear Ms. Zempolich:

I am enclosing herewith the Bill of Sale and Assignment wherein Agripro Biosciences Inc. has sold and assigned all of its right, title and interest in and to the PVPs listed on the attachment to the Bill of Sale to AGR Acquisition Corporation and hereby request that your records be changed to show the new owner as Agripro Seeds, Inc., the new name of AGR Acquisition Corporation. It is our understanding that the attachment was generated by someone in your office and forwarded to Agripro Biosciences Inc. at its request, and was subsequently forwarded to our office as attorneys for the purchaser in connection with the sale transaction.

As I indicated to you in our several previous telephone conversations, AGR Acquisition Corporation changed its corporate name to Agripro Seeds, Inc. the same date as the closing of the sale. I am enclosing herewith a copy of the Certificate of Amendment filed by the Delaware Secretary of State wherein the corporate name is changed.

If I counted correctly, there are 149 PVP certificates listed on the attachment to the Bill of Sale and Assignment. I am enclosing a check in the amount of \$3,725.00 payable to United States Treasury in payment of the \$25.00 per certificate fee to change the owner's name on your records.
