

I want my voice to be heard on this issue! Bring my petition to Washington!

I oppose the USDA 'organic' guidelines!

Dear ANHS,

I am outraged that the proposed guidelines would destroy the true meaning of "organic" food and render it meaningless!

All Americans understand the term "organic" food to mean "clean," "safe," "unadulterated" food...not artificial, contaminated junk!

Irradiated "foods," genetically engineered "foods," and "foods" grown in toxic municipal waste sludge are in no way worthy to be called "organic!"

Please do everything possible to let government officials and the food industry know that I strongly oppose the proposed guidelines as written!

Any attempt to distort the term "organic" is an insult to all Americans!

I demand the right to an accurate, uncompromised "organic" label.
