

Re. Docket #TMD-94-00-2

Dear Ms. Stommes:

Topic: Crops/Handling/National List

I support the NOSB's prohibition on the use of municipal sewer sludge. I am concerned with residue levels of heavy metals, pesticides and contaminants such as PCBs, and I agree with the NOSB that sewage sludge is "synthetic" and "unacceptable for use in organic crop production."

Topic: Handling/National List

I support the NOSB's prohibition on the use of ionizing radiation (irradiation).

Sincerely yours,
