

Re. Docket #TMD-94-00-2

Dear Ms. Stommes:

Topic: National List

I oppose all USDA changes to the NOSB's National List of Allowed and Prohibited Substances. Specifically, I agree with the NOSB's findings that the following are *not* an acceptable part of organic practice: Piperonyl Butoxide, genetically engineered *Pseudomonas florescens* with a B.t. gene, and genetically engineered chymosin.

Topic: General/Crops/Handling/National List

I support the NOSB's prohibition on the use of *all* potential genetic engineering techniques, including the prohibition on genetically engineered foods, processes, and inputs.

Sincerely yours,
