

Keep "Organic" Organic

Docket #TMD-94-00-2

Dear _____

The present USDA Proposed Rule contradicts the Organic Food Production Act passed by Congress.

I oppose Genetically Engineered Organisms in organic foods.

The long term health and environmental impacts are unknown with potential high risks.

I oppose irradiation in organic foods. A process to kill bacteria also impacts the nutritional value of the food.

I oppose irresponsible use of antibiotics with organically raised livestock.

The USDA needs to restrict the use of hormones and sterolds and ban the use of rendered animals as feed to herbivore animals.

I oppose the use of toxic sludge in organic farming. This sludge may be contaminated with heavy metals such as lead and cadmium.

I support the National Organic Standards Boards recommendations for keeping "Organic" Organic. Please take their recommendations in order to maintain the healthiest and safest food for human beings, animals and the environment.
