

Re: TMD-94-00-2

Dear Secretary Glickman,

As a consumer of organic foods, I am appalled that the proposed organic rules allow the very agricultural practices I shun when I choose my food.

- The use of sewage sludge as fertilizer (205.22)
- Genetically Engineered Organisms (205.26)
- Indoor & confinement rearing of livestock (205.15)
- Refeeding of animal parts (205.13)
- Liberal livestock drug use (205.14)
- Food Irradiation (205.17)

As a citizen I am concerned that the prohibition of "green" labels (205.103) is an abridgement of free speech.

I insist that the proposed regulations be withdrawn and rewritten according to the NOSB recommendations.

Yours truly,
