To Whom it May Concern,

We are "Orange Truck Farm", an Oregon Tilth Certified Organic farm specializing in potatoes. We are located in Merrill, Oregon.

Our market window is limited to our capability to maintain the quality of our tubers in storage. "1, 4 Sight" has been presented to us as a naturally occurring dormancy enhancer that not only would delay sprouting, it would also minimize shrinking. "1, 4 Sight" has been successfully tested on seed potatoes. It would enable us to lengthen our market period and allow us to grow our own seed potatoes. Sources of Organic seed potatoes are limited and the shipping is prohibitive. "1, 4 Sight" would be very valuable to our long term organic farming plans.

Sincerely,  
The Orange Truck Farm

To Whom it May Concern,

I am, Vicki Schmidt, a small organic grower in Terrebonne Oregon.

Potato Storage, for any length of time, for a small grower is very difficult. Limited storage time greatly limits my marketing time.

"1, 4 Sight", according to my understanding would allow me to maintain my product quality as I extend storage time.

This product would be a valuable asset to my organic program.

Sincerely,

Vicki Schmidt

To whom it may concern:

My name is Gavin Rajnus. I am a fourth generation seed potato grower. I am writing to voice my opinion on the use of 1,4/9ight on organic potatoes.

It is my belief that this product would be extremely beneficial to the organic industry. It would allow the grower much better storage capabilities. This would provide for a longer period to sell organics on the fresh market, as well as better storage for the seed grower.

Please accept my support for the use of 1,4/9ight on organic potatoes in the future.

Respectfully,

Gavin Rajnus  
Rajnus Brothers Seed

August 29,

To Whom it May Concern:

I am familiar with 1,4Sight use on commercial potatoes. I may be an organic grower in the future and would use 1,4Sight if it was labeled for organic use. It would be a very important tool in keeping stored potatoes healthy and help retain their quality.

Sincerely

To Whom it Concerns,

I am an organic potato grower and shipper. I have seen information on 1,4Sight, and believe it could be an important product to allow me to market my crop over a longer period of time. I would like to have this product available for organic use in the future.

Sincerely,

Richard V. Raynes
