The U.S. Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternate means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint, write to the USDA, Office of Civil Rights, Room 326-W, 1400 Independence Avenue, SW, Washington, DC 20250-9410, or call (202) 720-5964 (voice and TDD). USDA is an equal employment opportunity employer.

1. PURPOSE

This directive specifies the policy and technical requirements for official inspection and weighing records transmitted to the Federal Grain Inspection Service (FGIS) Inspection Data Warehouse (IDW) by official service providers under the United States Grain Standards Act (USGSA) and Agricultural Marketing Act of 1946 (AMA).

2. REPLACEMENT HIGHLIGHTS

This directive supersedes FGIS Program Directive 9290.16, Improving Service Delivery and Enhancing Information Sharing Between the Official Agencies and the Official FGIS System, dated 7-30-99. This directive is updated to reflect changes to data record format and data submission requirements. **UPDATE on 02-24-2021:** Expanded the length of the Remarks field on Page 9 from 8000 characters to 32000 characters.

3. BACKGROUND

Official service providers (FGIS field offices, delegated states, and designated agencies) have been transmitting inspection and weighing records to the National Quality Database (NQDB) since June 1998. File standards were implemented based on the expected adaptation by the grain industry of the Electronic Data Interchange (EDI) software system. Inspection and weighing results, in turn, became available to customers of the official system through electronic transmission.

As the grain and oilseed industries migrated from the EDI to the AgXML standard and as the demand increased for electronic data transfer, FGIS recognized the need to replace the NQDB with a data warehouse that better supports official inspection activities and customer needs. The IDW shall serve as the single FGIS data warehouse for official inspection and weighing records resulting from services performed under the USGSA and AMA. IDW replaces the current Export Grain Information System (EGIS), Grain Inspection and Weighing Information System (GIWIS), and NQDB. IDW shall also serve as a warehouse for quality control data and enable official service providers to access their respective performance records on a daily basis.

4. POLICY

Official service providers are required to electronically collect and transmit to IDW detail shiplot records and summary records for inspection and weighing services, excluding Class Y weights and Official Commercial Inspection Service (OCIS), beginning January 2008. Class Y weights, OCIS, and other than shiplot detail records may be transmitted to IDW at the option of the service provider.

Records must be submitted on a daily basis in either the CSV (comma delimited) or XML format according to the requirements in Attachments 1 - 7. An automatic screening of received data will generate an e-mail notification to official service providers identifying any rejected records and listing the cause for rejection. Service providers must correct rejected records and resubmit them to IDW within one business day.

5. GENERAL REQUIREMENTS

Summary inspection/weighing records report services performed on carriers, lots, and submitted samples. Summary records include the information used to complete the official service certificate. Detail inspection records report subplot, component, and subsample results when the combined-lot, Cusum and round-lot inspection plans are used. Detail records are mandatory for shiplots only.

FGIS's Certificate (CRT) and Inspection, Testing, and Weighing (ITW) applications automatically transmit required and optional records to IDW. These applications are available to official service providers upon request. Prior to the deployment of ITW (scheduled for deployment in 2008), the current Cusum application, used for all export shiplot inspections, will provide the required data for IDW.

When portions of grain are only sampled or are sampled and inspected but not loaded on board the carrier during a Cusum inspection, summary records for these portions must be submitted to IDW for reporting purposes. A separate summary record must also be submitted for any material portion that is loaded on board the carrier. FGIS's Cusum application has been modified to provide the following records for certification of shiplot inspections:

- a. Summary record for grain meeting contract specifications and loaded on board the carrier
- b. Detail records for all sublots, components, and/or subsamples inspected, regardless of disposition
- c. Summary record for any material portion loaded on board the carrier
- d. Summary record for any portion returned to the elevator

When at least one factor is analyzed for a portion of grain that is returned to the elevator (referred to as Rejected & Returned or as a Local), Cusum will generate a summary record for a factor-only inspection. No grade will be assigned to this record. When a portion of grain is returned to the elevator without any factor analysis having been made, Cusum will generate a summary record for a sample-only service.

A data record that has been superseded by a corrected record or a review inspection record should not be marked as a voided record (refer to Attachments 1 and 5 for Purpose Code). Records that have been voided but not issued due to data entry errors should not be transmitted to IDW.

6. RECORD ACCESS AND REPORTS

Official service providers and customers are able to access their respective inspection and weighing results by selecting the IDW application through the FGIS Application Menu website at <https://fgis.gipsa.usda.gov>. In order to access database records, customers and official inspection personnel must first establish an eAuthentication account with a Level 2 access through the United States Department of Agriculture (USDA) by logging in to the www.usda.gov website. The individual must then request access to the IDW application by selecting the IDW application through the FGIS Application Menu website. Access to different levels of information is granted by a FGIS application security administrator based on the identity and role of the individual. A customer has access only to records containing that customer's specific customer number. Official agency personnel have access to all records specific to their respective agencies. FGIS personnel have access to records as determined by their assigned identities and roles.

In order to access IDW records, customers must initially request the assignment of a customer number through FGIS's Customer Information Management (CIM) system. This application is available by visiting FGIS's Common Business System Menu website at <https://gcbs.gipsa.usda.gov>. When a customer number has been assigned, the customer is responsible for notifying the service provider to include it on any inspection and weighing record that the customer may want to access through IDW.

Customers may also request daily transmissions of their inspection and weighing records if they have been assigned a customer number by IDW. Customers specify the format (CSV or XML) of the records and the transmission method (email attachment or web server) by entering their preferences on their customer records in CIM.

The general public may access summary export inspection and weighing reports through an export grain search screen. A user will not have to be authenticated by USDA or authorized for IDW in order to access this information.

Additionally, any user can view a specific IDW record through the "View an Individual Record" option on the Inspection Data Warehouse System Menu Page by entering the certificate number, date of service, and identification of the carrier, lot, or sample.

Routine export, administrative tonnage fee billing, and supervision fee billing reports will be generated by IDW as the EGIS and GIWIS systems are phased out. Authorized users can create ad hoc reports by selecting and downloading records through the "Search My Certificate Records" option on the menu page.

7. COMPUTER HARDWARE AND SOFTWARE REQUIREMENTS

Service Providers

Official service providers must have a computer system with email capability that supports the collection, storage, and transmission of inspection and weighing records. The inspection and weighing software may be multi-functional to include certification, billing, and other administrative functions. In order to merge all information into a national database, records must conform to the standard record format in Attachments 1 – 2 or to the AgXML (Version 3) schema.

Service providers utilizing the CRT application's stand-alone version must meet the following requirements:

- a. Windows XP Professional operating system with Service Pack 2 (SP2)
- b. Internet Information Services 5.1 or higher
- c. Microsoft .NET framework 1.1
- d. 512 Mg memory (1 gig recommended)
- e. 1.0 Ghz processor (2.0 or higher recommended)

General Users

Because IDW is a web-based application, the only requirement for accessing it is Internet connectivity.

8. FILE STRUCTURE

CSV Format

Data records are submitted in delimited ASCII flat files. Each record is terminated by the DOS end-of-line sequence, CR-LF. Fields (whether populated or empty) are separated by a delimiting comma (.). All fields are enclosed in double quotes. There are no padding and justification requirements. Data types are character, integer, and decimal. (For IDW purposes, integer and decimal are not binary; they are ASCII strings representing valid integer and decimal numbers.) Values are case-sensitive.

XML Format

The AgXML (Version 3) schema is available at <http://www.agxml.org>. Attachments 5 – 7 provide the Xpath and values for the elements that comprise the summary and detail records. Values are case-sensitive.

File Naming Convention

In order to ensure that each data file is uniquely labeled, the following naming convention is required for all data submissions to IDW:

- a. Date and time (MMDDYYYYHHMMSS)
- b. Hyphen
- c. Official agency or field office alpha code
- d. Hyphen
- e. Service point number
- f. Period
- g. File extension

Example: 05012007103530-NOFO-123456.xml

File Content

Data files should contain only records from official inspection and weighing services. Detail records may be submitted separately from ITW or bundled with the associated summary record in the same file. When files are compiled, detail records should immediately follow the associated summary record.

9. QUESTIONS

Direct any questions concerning IDW requirements to FGISonlinesupport@usda.gov.

Attachments

ATTACHMENT 1: CSV Summary Record Field Definitions

CSV Summary Record Field Definitions						
Field Name	Format	Length	Value(s)	Definition	Key	Requirements
Record Type	Char	1	S, D	Code that identifies type of record (Summary Inspection and/or Weighing, Detail Inspection)	S = Summary Inspection and/or Weighing, D = Detail Inspection	Mandatory
Certification Location	Integer	7	7-character service point number	FGIS-assigned number for the location of the office that issues the certificate		Mandatory
Analysis Weighing Location	Integer	7	7-character service point number	FGIS-assigned number for the location where the sample analysis or weighing service is performed		Mandatory when any sample analysis or weighing service (other than with a portable platform scale) is performed
Lot Number	Char	20		Unique alpha-numeric identifier assigned to a lot when Cusum, combined-lot, or round-lot inspections are performed. Detail inspection records are assigned same lot number as assigned to the associated summary inspection/weighing records		Mandatory for all summary records associated with a lot when detail records are generated as a result of a Cusum, combined-lot, or round-lot inspection
File Sample ID	Char	20		Identification assigned by the service provider to a file sample		Mandatory for all products, except processed commodities, if Service Type = EX, OL, OS, QI, SS, or W
Inspection Type	Char	4	O,R,A,B,S,N	Level of inspection (Original, Reinspection, Appeal, Board Appeal, Supervision, New Original)	O = Original, R = Reinspection, A = Appeal, B = Board Appeal, S = Supervision, N = New Original	Mandatory if Service Type ≠ BW, CW, X, or Y
Commodity/Carrier Location	Char	50		Location where the commodity is located at the time of sampling or other service or where the stowage examination is performed (e.g. name of elevator, fleet, rail yard, or warehouse)		Mandatory if Service Type ≠ CS, OS, RT, or SS and Product = GR
City	Char	30		City where the commodity is located at the time of sampling or other service or where the stowage examination is performed		Mandatory if Service Type ≠ CS, OS, RT, or SS
State	Char	4	Standard 2-character abbreviation	State where the commodity is located at the time of sampling or other service or where the stowage examination is performed		Mandatory if Service Type ≠ CS, OS, RT, or SS
Ordered By	Char	50		Name of the customer requesting service		Mandatory
Cert Number	Char	30	Agency/field office abbreviation plus serial number	Serial number of certificate		Mandatory
Cert Date	Char	8	YYYYMMDD	Date certificate is generated (cert number is assigned)		Mandatory
<p>¹ Service Type: Repeat 10 x ² Special Grade: Repeat 7 x ³ Destination Quantity, Destination Quantity Unit of Measure, Destination: Repeat as a set 10 x ⁴ Moisture Load Order, Moisture Load Order Percent: Repeat as a set 3 x ⁵ Protein Load Order, Protein Load Order Percent: Repeat as a set 3 x ⁶ Oil Load Order, Oil Load Order Percent: Repeat as a set 3 x ⁷ Starch Load Order, Starch Load Order Percent: Repeat as a set 3 x ⁸ Factor Code, Inspection Result, Inspection Result Unit of Measure, Factor Remarks, License Number, Factor Test Equipment, Factor Test Location: Repeat as a set 40 x</p>						

CSV Summary Record Field Definitions

Field Name	Format	Length	Value(s)	Definition	Key	Requirements
Service Type ¹	Char	4	BW,CC,CI,CL, CLO,COC,COFP ,CS,CW,ES,EX, FE,OBL,OL,OS, QI,RT,S,SE,SI, SS,W,WF,X,Y	Type of service performed (See Attachment 3)	See Attachment 3	Mandatory
Purpose Code	Char	4	O,C,R,V	Purpose of the record (Original, Void, Duplicate, Corrected)	O = Original, C = Void, R = Duplicate, V = Corrected	Mandatory
Old Cert Number	Char	30		Serial number of a certificate that has been replaced by a duplicate, corrected, or superseded certificate		Mandatory if Purpose Code = V or if Inspection Type = R
Divide Type Code	Char	4	M,D	Code to identify a record as the master or a divide when divided-lot certificates are issued	M = Master, D = Divide	Mandatory if Number of Divides is populated
Number of Divides	Integer	4		Number of divided certificates issued for a lot		Mandatory if divided-lot certificate is issued
Movement	Char	4	I,O,L,E	In, Out, Local, Export	I = In, O = Out, L = Local, E = Export	Mandatory if Service Type = CI, CL, CW, EX, OL, W, X, or Y and product is a grain
Carrier Type	Char	4	T,R,B,L,C,S,O	Type of carrier used to transport the commodity (Truck, Rail, Barge, Lash Barge, Container, Ship, Other)	T = Truck, R = Rail, B = Barge, L = Lash Barge, C = Container, S = Ship, O = Other	Mandatory if product is a grain and Movement = E, O or I (Do not populate this field for submitted samples)
Number of Carriers	Integer	4		Number of carriers comprising the lot		Mandatory if product is a grain and Movement = E, O, or I and Carrier Type = T, R, B, L, or C
Identification	Char	100		Identification of the carrier, lot, or submitted sample		Mandatory
Sampling Method	Char	4	P,M,C,L,W,H,X, B,O	Method used to obtain the official sample (Probe, Mechanical Diverter, Ellis Cup, Pelican, Woodside, Mechanical Probe, Multiple, Bag Trier, Other)	P = Probe, M = Mech. Diverter C = Ellis Cup, L = Pelican, W = Woodside, H = Mech.Probe, X = Multiple, B = Bag Trier, O = Other	Mandatory if Service Type = CL, OL, W, or S and product is a grain
Top Feet Sampled	Integer	2		Depth that the probe is inserted into a commodity if the bottom of the carrier is not sampled		Mandatory if sample is obtained by probing and the bottom of the carrier is not sampled
Date Sampled	Char	8	YYYYMMDD	Date sampling of the subplot or lot is completed		Mandatory if Sampling Method is populated
Time Sampled	Char	4	HHMM	Time sampling of the subplot or lot is completed		Optional
Grade	Char	4	CHP,PHP,1,2,3, 4,5,6,SG,NG, SUBSTD	Level of quality or value as specified in the standards	CHP=ChoiceHandpicked, PHP=PrimeHandpicked, SG = Sample Grade, NG = No Grade, SUBSTD=Substandard. NOTE: Add + for "or better"	Mandatory whenever a grade is assigned

CSV Summary Record Field Definitions

Field Name	Format	Length	Value(s)	Definition	Key	Requirements
Commodity Class	Char	10	Standard FGIS abbreviation	Lowest level of agricultural commodity class or subclass as defined in the Agricultural Product Standards		Mandatory if Service Type ≠ ES, FE, SE, or SI
Special Grade ²	Char	4	Standard FGIS abbreviation	Special factor or condition present in a commodity that is supplemental to the grade		Mandatory whenever a special grade is assigned
Quantity/ Official Weight	Integer	9		Volume, weight, or size of the lot or sample inspected or weighed		Mandatory if Service Type ≠ CS, OS, RT, SS, ES, FE, SE, or SI
Quantity/ Official Weight Unit of Measure	Char	4	LB,MT,BU,GR, QT,TL,CL,CT, BA,BL	Description of how the lot or sample is measured	LB = Pounds, MT = Metric Tons, BU = Bushels, GR = Grams, QT= Quarts, TL = Trucklot, CL = Carlot, CT = Containerlot BA = Bargelot, BL = Bales	Mandatory if Quantity/ Official Weight is populated
Cert Signature Inspector Number	Integer	5	5-digit number	FGIS-assigned number for the individual whose name appears on the certificate		Mandatory
Date of Service	Char	8	YYYYMMDD	Date inspection or weighing is completed		Mandatory
Time of Service	Char	4	HHMM	Time inspection or weighing is completed		Optional
Remarks	Char	32000		Information from the remarks section of the certificate that is not reported in any other field		Mandatory if remarks are included on certificate
Agency Field Office Code	Char	10	Standard 2 - 4 character abbreviation	Official agency or field office that performs the inspection or weighing service		Mandatory
Service Request Number	Char	25	Service point number plus date service is requested (YYYYMMDD) plus 3-character sequential number	Unique number assigned to each request for service that is used to link inspection & weighing records to the request for service		Mandatory if product is a grain and Movement = E or when detail records are generated as a result of a Cusum, combined-lot, or round-lot inspection
Load Order Number	Char	50		Unique lot identifier for the inspection and/or weighing log		Optional
Stowage Area Examined	Char	1	Y,N	Indication as to whether or not a stowage area of a carrier has been examined		Mandatory if Movement = E or O
GIPSA File Sample ID	Integer	9		Unique number automatically assigned by IDW to each incoming inspection record for original service or review inspection service- basis new sample		IDW will populate this field
Superseded By	Char	25		Certificate number of the superseding record. Populated by IDW		IDW will populate this field

⁸ Factor Code, Inspection Result, Inspection Result Unit of Measure, Factor Remarks, License Number, Factor Test Equipment, Factor Test Location: Repeat as a set 40 x

CSV Summary Record Field Definitions

Field Name	Format	Length	Value(s)	Definition	Key	Requirements
Customer Number	Integer	18		FGIS-assigned number for the customer. Required for a customer to access data from IDW		Mandatory for administrative tonnage fee billing or when specified by the customer
GIPSA Fee	Char	1	Y,N	Field to indicate if record is to be used for computing supervision or administrative tonnage fees	Y = Yes, N = No	Mandatory
Date Started	Char	8	YYYYMMDD	Date weighing begins		Optional
Time Started	Char	4	HHMM	Time weighing begins		Optional
Type Shipment	Char	4	BU,SA	Bulk or sack	BU = Bulk, SA = Sack	Mandatory if Service Type ≠ CS, ES, FE, OS, RT, SE, SI, or SS
Inspection Weighing Service	Char	4	I,W,IW	Classification of service as inspection only, weighing only, or inspection & weighing	I = Inspection Only W = Weighing Only IW = Inspection & Weighing	Mandatory if product is a grain and if Service Type = CI, CW, EX, OL, S, WF, X, or Y
Destination Quantity ³	Integer	9		Weight or size of the lot inspected or weighed for export under the USGSA		Mandatory if Destination is populated
Destination Quantity Unit of Measure ³	Char	4	LB,MT,BU,TL,CL,CT,BA,BL	Description of how the lot is measured	LB = Pounds, MT = Metric Tons, BU = Bushels, TL = Trucklot, CL = Carlot, CT = Containerlot, BA = Bargelot, BL = Bales	Mandatory if Destination Quantity is populated
Destination ³	Integer	4	Standard 4-digit code	Country of destination for export shipments based on Commerce Department codes		Mandatory if Movement = E and Divide Type Code ≠ D
Moisture Load ⁴ Order	Char	4	MI,MA,AV	Specified moisture load order requirement (minimum, maximum, or average)	MI = Minimum, MA = Maximum, AV = Average	Mandatory if specified in the load order for a shiplot of grain and if Service Type = EX
Moisture Load Order Percent ⁴	Integer or Decimal	4		Specified moisture load order requirement (percent)		Mandatory if specified in the load order for a shiplot of grain and if Service Type = EX
Protein Load Order ⁵	Char	4	MI,MA,AV,OR	Specified protein load order requirement (minimum, maximum, average, or ordinary)	MI = Minimum, MA = Maximum, AV = Average, OR = Ordinary	Mandatory if specified in the load order for a shiplot of grain and if Service Type = EX
Protein Load Order Percent ⁵	Integer or Decimal	4		Specified protein load order requirement (percent)		Mandatory if specified in the load order for a shiplot of grain and if Service Type = EX
Oil Load Order ⁶	Char	4	MI,MA,AV,OR	Specified oil load order requirement (minimum, maximum, average, or ordinary)	MI = Minimum, MA = Maximum, AV = Average, OR = Ordinary	Mandatory if specified in the load order for a shiplot of grain and if Service Type = EX
Oil Load Order Percent ⁶	Integer or Decimal	4		Specified oil load order requirement (percent)		Mandatory if specified in the load order for a shiplot of grain and if Service Type = EX

¹ Service Type: Repeat 10 x

⁷ Starch Load Order, Starch Load Order Percent: Repeat as a set 3 x

⁸ Factor Code, Inspection Result, Inspection Result Unit of Measure, Factor Remarks, License Number, Factor Test Equipment, Factor Test Location: Repeat as a set 40 x

CSV Summary Record Field Definitions

Field Name	Format	Length	Value(s)	Definition	Key	Requirements
Starch Load Order ⁷	Char	4	MI,MA,AV,OR	Specified starch load order requirement (minimum, maximum, average, or ordinary)	MI = Minimum, MA = Maximum, AV = Average, OR = Ordinary	Mandatory if specified in the load order for a shiplot of grain and if Service Type = EX
Starch Load Order Percent ⁷	Integer or Decimal	4		Specified starch load order requirement (percent)		Mandatory if specified in the load order for a shiplot of grain and if Service Type = EX
Sublots With Insects	Integer	4		Number of sublots containing one or more live insects		Mandatory for shiplots if Service Type = EX
Components Infested	Integer	4		Number of Infested Components		Mandatory for shiplots if Service Type = EX
Insects Per Lot	Integer	4		Total number of live insects in the lot		Mandatory for shiplots if Service Type = EX
Insecticide	Char	4	AC,MA,RE,OT	Type of insecticide applied to a component, subplot, or lot	AC = Actellic, MA = Malathion, RE = Reldan, OT = Other	Mandatory for shiplots if Service Type = EX and insecticide was applied
Dust Suppressant	Char	4	OI,WA,OT	Type of dust suppressant applied to a component, subplot, or lot (e.g. oil)	OI = Oil, WA = Water, OT = Other	Mandatory for shiplots if Service Type = EX and dust suppressant was applied
Dye	Char	1	Y,N	Field for capturing if a dye is applied to a component, subplot, or lot	Y = Yes, N = No	Mandatory for shiplots if Service Type = EX
Fumigant	Char	4	PH, OT	Type of fumigant applied to a component, subplot, or lot (e.g. aluminum phosphide)	PH = Aluminum phosphide, OT = Other	Mandatory for shiplots if Service Type = EX and fumigant was applied
Aflatoxin Test Basis	Char	4	CP,SL,OT, BO	Basis of the sample used for aflatoxin analysis (e.g. composite, subplot, other, both composite and subplot)	CP = Composite, SL = Sublot, OT = Other, BO = Both composite & subplot	Mandatory for shiplots if Service Type = EX and if Factor Code = AFLA
Factor Code ⁸	Char	10	Standard FGIS abbreviation	Analytical factor measured		Mandatory if Service Type = CL, CS, EX, OL, OS, QI, RT, SS, or W
Inspection Result ⁸	Char	50	See Attachment 4	Result from the analysis of a factor		Mandatory if Factor Code is populated
Inspection Result Unit of Measure ⁸	Char	20	%, ct, F, gr lb/bu, n/a, ppb, ppm	Format for reporting inspection results as specified in the Agricultural Product Standards	% = Percent, ct = Count, F = Fahrenheit, gr = Grams, lb/bu = Pounds Per Bushel, n/a = Not Applicable, ppb = Parts Per Billion, ppm = Parts Per Million	Mandatory if Factor Code is populated
Factor Remarks ⁸	Char	250		Supplemental information related to an inspection result (e.g. 12% moisture basis for a protein result)		Populate when applicable

¹ Service Type: Repeat 10 x

ATTACHMENT 2: CSV Detail Record Field Definitions

CSV Detail Record Field Definitions						
Field Name	Format	Length	Value(s)	Definition	Key	Requirements
Record Type	Char	1	S, D	Code that identifies type of record (Summary Inspection and/or Weighing, Detail Inspection)	S = Summary Inspection and/or Weighing, D = Detail Inspection	Mandatory
Agency Field Office Code	Char	10	Standard 2 - 4 character abbreviation	Official agency or field office that performs the inspection or weighing service		Mandatory
Lot Number	Char	20		Unique alpha-numeric identifier assigned to a lot when Cusum, combined-lot, or round-lot inspections are performed. Detail inspection records are assigned same lot number as assigned to the associated summary inspection/weighing records		Mandatory
Sample Identification	Char	20		Identification of the sample analyzed during the inspection of the lot (e.g. subplot #, material portion #, railcar ID)		Mandatory
Sequence Number	Integer	4		Sequential number that indicates the subplot inspection order during a Cusum inspection		Mandatory for Cusum inspections
Level	Char	4	L,C,S	Portion of the lot represented by the sample	L = Sublot, C = Component, S = Subsample	Mandatory
Disposition	Char	4	L,O,R,S,X	Status of the commodity after sampling or inspection	L = Local, O = On Board, R = Rejected & Returned, S = Superseded, X = Transfer	Mandatory

¹ Factor Code, Inspection Result, Inspection Result Unit of Measure, Factor Remarks, License Number, Factor Test Equipment, Factor Test Location: Repeat as a set 40 x

CSV Detail Record Field Definitions

Field Name	Format	Length	Value(s)	Definition	Key	Requirements
Inspection Type	Char	4	O,R,A,B,S,N	Level of inspection (Original, Reinspection, Appeal, Board Appeal, Supervision, New Original)	O = Original, R = Reinspection, A = Appeal, B = Board Appeal, S = Supervision, N = New Original	Mandatory
Date Sampled	Char	8	YYYYMMDD	Date sampling of the subplot or lot is completed		Mandatory
Time Sampled	Char	4	HHMM	Time sampling of the subplot or lot is completed		Optional
Date of Service	Char	8	YYYYMMDD	Date inspection or weighing is completed		Optional
Time of Service	Char	4	HHMM	Time inspection or weighing is completed		Optional
Quantity/Official Weight	Integer	9		Volume, weight, or size of the lot or sample inspected or weighed		Mandatory
Quantity/Official Weight Unit of Measure	Char	4	LB,MT,BU,GR,QT,TL,CL,CT,BA,BL	Description of how the lot or sample is measured	LB = Pounds, MT = Metric Tons, BU = Bushels, GR = Grams, QT = Quarts, TL = Trucklot, CL = Carlot, CT = Containerlot, BA = Bargelot, BL = Bales	Mandatory
Remarks	Char	250		Information from the remarks section of the inspection log that is not reported in any other field		Optional
Service Request Number	Char	25	Service point number plus date service is requested (YYYYMMDD) plus 3-character sequential number	Unique number assigned to each request for service that is used to link inspection & weighing records to the request for service		Mandatory if product is a grain and Movement = E or when detail records are generated as a result of a Cusum, combined-lot, or round-lot inspection
Customer Number	Integer	18		FGIS-assigned number for the customer. Required for a customer to access data from IDW		Mandatory when specified by the customer
File Sample ID	Char	20		Identification assigned by the service provider to a file sample		Mandatory if Service Type = EX, OL, or QI
GIPSA File Sample ID	Integer	9		Unique number automatically assigned by IDW to each incoming inspection record for original service or review inspection service- basis new sample		IDW will populate this field
Cert Number	Char	30	Agency/field office abbreviation plus serial number	Serial number of certificate		Optional

¹ Factor Code, Inspection Result, Inspection Result Unit of Measure, Factor Remarks, License Number, Factor Test Equipment, Factor Test Location: Repeat as a set 40 x

CSV Detail Record Field Definitions						
Field Name	Format	Length	Value(s)	Definition	Key	Requirements
Factor Code ¹	Char	4	Standard FGIS abbreviation	Analytical factor measured		Mandatory except for sampling only
Inspection Result ¹	Char	50	See Attachment 4	Result from the analysis of a factor		Mandatory if Factor Code is populated
Inspection Result Unit of Measure ¹	Char	20	%, ct, F, gr lb/bu, n/a, ppb, ppm	Format for reporting inspection results as specified in the Agricultural Product Standards	% = Percent, ct = Count, F = Fahrenheit, gr = Grams, lb/bu = Pounds Per Bushel, n/a = Not Applicable, ppb = Parts Per Billion, ppm = Parts Per Million	Mandatory if Factor Code is populated
Factor Remarks ¹	Char	250		Supplemental information related to an inspection result (e.g. 12% moisture basis for a protein result)		Populate when applicable
License Number ¹	Integer	5	5-digit number	FGIS-assigned number for the individual who performs the inspection or weighing service		Optional
Factor Test Equipment ¹	Char	50		Serial number or unique identifier of the equipment used in the factor analysis		Optional
Factor Test Location ¹	Integer	7	7-character service point number	FGIS-assigned number for the location where the analysis is performed		Optional

¹ Factor Code, Inspection Result, Inspection Result Unit of Measure, Factor Remarks, License Number, Factor Test Equipment, Factor Test Location: Repeat as a set 40 x

ATTACHMENT 3: Values for Service Type Field

Values for Service Type Field		
Service Type	Value	Act
Bulkweighing	BW	AMA
Checkcounting	CC	AMA
Condition Inspection	CI	Both
Commercial Sample-Lot	CL	USGSA
Checkloading	CLO	AMA
Condition of Food Containers	COC	AMA
Commodity Operations Fumigation Protocol	COFP	AMA
Commercial Submitted	CS	USGSA
Checkweighing	CW	Both
Examination Service	ES	AMA
Export	EX	USGSA
Facility Examination	FE	AMA
Observation of Loading	OBL	AMA
Official Sample-Lot	OL	USGSA
Official Submitted	OS	USGSA

Note: When sampling and stowage examinations are performed as part of another service (e.g. Official Sample-Lot or Export), do not report them as a separate service type. Sampling Service applies when a lot is officially sampled but not analyzed by the service provider. The following table lists the service types that apply individually or in combination with each type of inspection and weighing certificate.

Values for Service Type Field		
Service Type	Value	Act
Lot (Quality) Inspection	QI	AMA
Registered Type-Sample	RT	AMA
Sampling Service	S	Both
Stowage Examination	SE	Both
Plant Sanitation Inspection	SI	AMA
Submitted Sample	SS	AMA
Warehouseman's Sample-Lot	W	USGSA
Witness Fumigation	WF	Both
Class X Weights	X	USGSA
Class Y Weights	Y	USGSA
Note: When sampling and stowage examinations are performed as part of another service (e.g. Official Sample-Lot or Export), do not report them as a separate service type. Sampling Service applies when a lot is officially sampled but not analyzed by the service provider. The following table lists the service types that apply individually or in combination with each type of inspection and weighing certificate.		

Values for Service Type Field	
Type of Certificate	Service Type
Commodity Inspection	BW, CC, CI, CLO, COC, COFP, CW, ES, FE, OBL, QI, S, SI, WF
Commodity Submitted Sample Inspection	RT, SS
Commodity Weight	BW, CW
Official Commercial Sample-Lot Inspection	CL
Official Commercial Submitted Sample Inspection	CS
Official Export Inspection	EX
Official Grain Weight	CW, X
Official Sample-Lot Inspection	CI, OL, S, WF
Official Stowage Examination	SE
Submitted Sample Inspection	OS
Supervision of Grain Weight	Y
Warehouseman's Sample-Lot Inspection	W

ATTACHMENT 4: Inspection Result Values for IDW Records

- a. Percent: Integer or decimal number to the precision required for the factor (e.g. tenths, hundredths)
- b. Count: 1/3 and 2/3 to be reported as .33 and .67, respectively
- c. Condition (e.g. Odor): Standard FGIS abbreviation
- d. StarLink: Report as "Positive" or "Negative". Report complete statement in the Factor Remarks field.
- e. Mycotoxins: In order to reduce the variability in which the results are reported, the following rules apply:
 - (1) If the statement contains "equal to or less than", report the result as: <=
 - (2) If the statement contains "does not exceed", report the result as: <

- (3) If the statement contains “exceeds”, report the result as: >
- (4) If the Factor Code is AFLA and the statement contains “not detected”, report the result as: <5
- (5) If the Factor Code is DON or FUM and the statement contains “not detected”, report the result as: <0.5

Report complete statement in the Factor Remarks field.

Mycotoxin Examples:			
Factor Code	(Certificate Statement)	Inspection Result	Inspection Result Unit Of Measure
AFLA	*equal to or less than 20 ppb	<=20	ppb
AFLA	*does not exceed 5 ppb	<5	ppb
AFLA	*exceeds 20 ppb	>20	ppb
AFLA	*not detected	<5	ppb
AFLA	*13 ppb	13	ppb
DON	*equal to or less than 2 ppm	<=2	ppm
DON	*exceeds 2.5 ppm	>2.5	ppm
DON	*not detected	<0.5	ppm
DON	*equal to or less than 0.5 ppm	<=0.5	ppm
DON	*2 ppm	2	ppm
FUM	*equal to or less than 0.5 ppm	<=0.5	ppm
FUM	*2 ppm	2	ppm
FUM	*exceeds 5 ppm	>5	ppm
FUM	*not detected	<0.5	ppm
ZEAR	*exceeds 1000 ppb	>1000	ppb
ZEAR	*equal to or less than 50 ppb	<=50	ppb
ZEAR	*does not exceed 1000 ppb	<1000	ppb
ZEAR	200 ppb	200	ppb

ATTACHMENT 5: Summary Record AgXML Format
