### PATCH # 43

**DOCUMENT:** Tomatoes Shipping Point and Market Inspection Instructions, December 2005

**REMARKS:** Numerous White, Yellowish White to Gold Specks on Tomatoes. This physiological factor is not a defect. It may be described using general terms and reported in the "Other" or in the "Remarks" sections as not affecting grade, reported at applicant's request. Research is ongoing and official USDA visual aids will be issued in the near future.

---

This PATCH represents official guidance. This PATCH is scheduled to be incorporated into the document listed above. After incorporation into the document listed above this PATCH will become obsolete. USDA is an equal opportunity provider, employer, and lender.
