The European dry whey price range expanded, and industry analysts describe the whey market as a bit inconsistent. Dry whey demand is generally more active, but buyer interest appears to vary widely across market applications. Feed markets are more lively, but the whey is moving at slightly lower prices. Food whey markets have seen an uptick in buyer interest in some export channels. Dry whey supplies are sufficient to meet most buyer needs, and active cheese production is keeping plenty of liquid whey available for drying.

Prices for: Western Europe, All First Sales, Free on Board - Port, , Conventional, and Edible Dry Whey

Price Range - Non-Hygroscopic; \$/MT: 750 - 1,125

Information for the period February 19 - March 1, 2024, issued biweekly

Secondary Sourced Information:
