Email us with accessibility issues with this report.

The Central and East dry buttermilk price range inched slightly higher. Cream volumes remain readily available in both the Central and East region. Churning schedules, too, remain robust in both regions. Condensed buttermilk availability is in line with recent weeks, and drying activity is commensurate with the rate of production. Inventories remain tight, however, with some processors sharing they are out of stock through May. Some contacts share they have been able to acquire spot loads through brokers.

Prices for: Eastern and Central U.S., All First Sales, F.O.B., Conventional, and Edible Buttermilk

Price Range ; \$/LB:

1.0800 - 1.1600

Information for the period April 15 - 19, 2024, issued weekly
