The Central and East dry buttermilk price range held steady this week. Due to quiet demand, dry buttermilk inventories are steady, and producers are filling spot load requests when they have inventory available. Drying schedules are keeping up with liquid buttermilk supply. Smaller volumes of liquid buttermilk are being sent to dryers as butter makers have slowed their churns to match tightening cream supplies. Cream volumes continue to tighten throughout the Central and East as heat has affected cow comfort and milk production. Butter contacts state that spot loads of cream are a rarity and contract cream is the primary source of their current production.

Prices for: Eastern and Central U.S., All First Sales, F.O.B., Conventional, and Edible Buttermilk
Price Range ; $/LB: 1.0800 - 1.1800
