Dry whey prices moved up 1 cent on both ends of the range in the West. For the mostly price series, the bottom end held firm and the top end moved slightly higher. Stakeholders note quieter trading this week and lighter domestic demand overall. Demand from international buyers is moderate. A few manufacturers say bleached dry whey stocks available for spot buyers is tight and will remain tight until partly through Q2. Processors relay steady production schedules. However, strong whey protein concentrate demand continues to transition some whey solids into whey protein concentrate production instead of sweet whey production.

Prices for: Western U.S., All First Sales, F.O.B., Extra Grade & Grade A, , Conventional, and Edible Dry Whey

Price Range - Non-Hygroscopic; \$/LB:	.4550 - .5600
