East dry whey prices are stable. "Quiet" was the descriptive term one contact used to describe the market this week. Dry whey sales have been slow, with not much product moving. Several contacts think that sales will increase during the upcoming major dairy conference. Production has remained steady in the East due to the steady state of cheese production. Inventories are more than adequate for the demand of the industry.

Prices for: Eastern U.S., All First Sales, F.O.B., Extra Grade & Grade A, , Conventional, and Edible Dry Whey

Price Range - Non-Hygroscopic; \$/LB:	.4500 - .5350
---------------------------------------	---------------

Information for the period April 21 - 25, 2025, issued weekly
