The East dry whey price range crept up this week, moving higher on both ends of the range. Dry whey demand has experienced a bump this last week. Closing prices on the CME have gone from $0.5250 July 22nd to $0.6200 July 31st. The uptick in prices has caught commodity traders' attention as they attempt to find available spot loads. Dry whey availability is tight. This market pressure has come as some producers report their drying schedules have slowed as they have plants down for maintenance. Some producers have shifted production to higher whey protein concentrates. Milk volumes are tight as rising temperatures in the East continue to affect cow comfort and milk production.

### Prices for: Eastern U.S., All First Sales, F.O.B., Extra Grade & Grade A, Conventional, and Edible Dry Whey

| Price Range - Non-Hygroscopic; $/LB: | .4400 - .5125 |

Information for the period July 29 - August 2, 2024, issued weekly
