Report 16

April 17, 2024

MMN Slug ID 1101 / Slug Name: MD_DA210

Email us with accessibility issues with this report.

Farm level milk production is trending level to higher in the East. Contacts note condensed skim demand has increased, and under Class prices are not as common as in recent weeks. In the Northeast, contacts share farm level milk outputs continue to trend higher. Class I demand continues to be variable as some educational institutions are yet to have a spring break. Class II demand is steady to stronger as warmer weather approaches. Class III demand is steady as cheese demand has firmed somewhat. Demand for cream is seasonally steady as butter processors continue to churn actively. In the Mid-Atlantic, farm level milk production is trending higher. Condensed skim availability has tightened over recent weeks. Class I demand is seasonally steady. Class II demand is steady to stronger. Demand for other Classes is unchanged. In the Southeast, contacts share flat farm level milk production. Class I demand is slightly higher than in recent weeks. Demand for other Classes is seasonally steady to stronger. In Florida, farm level milk outputs are trending flat. Class I demand is unchanged. Class II demand is trending higher. Cream multiples moved lower at the top of the All Class range over last week.
