All Heifers in the sale have met minimum standards for reproductive soundness, pelvic size, body condition and weight. They have also undergone a comprehensive health program, and were guaranteed bred to easy calving bulls, with many synchronized and artificially bred. Projected calving dates were given for all lots with the heifers expected to calve from mid-January thru April, with the majority due in February and March. The offering was screened for blemishes, muscle thickness, frame, body condition score (BCS), and disposition by a final screening committee comprised of official graders from the Missouri Department of Agriculture and USDA, then sorted into lots according to calving dates and body type similarity.
