Direct Hay Weighted Average Report for week ending 4/25/2025

Heavy rains over the last week stopped all field work once again. Flooding occurred along many smaller creeks and rivers across the state and standing water became common in many low-lying fields. All but a few counties in the NW and NE parts of the state have been removed from the drought monitor now. With most areas having ample moisture the above average temperatures this week should really get pastures and hay fields growing. As of earlier this week 69 percent of the state's pastures were rated in good to excellent condition, 23 percent fair and 4 percent poor. Hay prices are steady to weak, supply and demand are light to moderate. The Missouri Department of Agriculture has a hay directory at <https://apps.mda.mo.gov/haydirectory> or visit the University of Missouri Extension feed stuff finder at <https://feedstufffinder.org>
